Description of the product: (Include specific quantifiable details from tech data sheet. Advertising generalities are not appropriate.)

Daravair® 1000 is a liquid air-entraining admixture that provides freeze thaw resistance, yield control, and finishability performance across the full range of concrete mix designs. Daravair is a clean, light orange product designed to generate specification-quality air systems. Based on a high-grade saponified rosin formulation, Daravair 1000 is chemically similar to vinsol-based products, but with increased purity and supply dependability.

Restrictions, (installation and/or use):

Use of the product, (be specific to CDOT highway activities only):
Daravair 1000 air-entraining admixture may be used wherever the purposeful entrainment of air is required by concrete specifications.

Benefits to CDOT, (how will your product enhance quality, improve safety, save money, be a better value then other manufacturer's products):

- Rapid air build suitable for short mix cycles
- Can be used in wide spectrum of mix designs
