Consortium:		Tribe Code:	M25714
Tribe:	Ohkay Owingeh (Pueblo of San Juan)	Date:	12/11/2020
Funding Source:	TTP; (examples: IRR, IRRBP, 2% Planning, PLH-D)	Current FY:	2021
		STIP Amount:	$287,560

PROJECT INFORMATION

Project Name:	PoPay Avenue
Location:	Off of Highway 68; Main Entrance in to the Pueblo
Type of Work:	Reconstruction

M257140001

Route Number:	Rt 527 (10) (20)	Project Number:	
Length:	0.8 Miles	County:	Rio Arriba
State:	NM	Construction Year:	2026

Comments: Construction expenses are being "banked" for FY2022 through 2025 due to financial constraints. Contruction estimate is $400,000 so the Pueblo has to bank funds. We anticipate construction in 2026; with the Pueblo having to contribute to the construction expenses. CE and remaining construction expenses will be in FY2026. The Ohkay Owingeh Transportation Department will also work with the FHWA Innovative Office to seek additional funds for roadway innovations.

We anticipate a 2 inch mill with a 2 inch overlay; this is an existing paved roadway

Comments: Project involves street intersection redesign & reconstruction, because of high volume of vehicular and pedestrian traffic, blind spots caused by new building and other blind spots. All drainage inlets are plugged with debris, which prevents flood waters to reach the Zuni River, thus further causes pavement failures. Start to set aside TTP construction & const. engineering funds in FY22. Plan for construction in FY23.

State:	NM	Construction Year:	2022

Comments: NMDOT's State funded & lead agency for drainage improvement project. Involves EA reports, designs of retention ponds and concrete box culverts from milepost 15 to 18. Major runoffs overtops and plugs undersized culvert pipes, resulting in closure of NM 53 for safety precautions. NM 53 is a major arterial connector for goods & services, employment and hospital/emergency care. Zuni Tribe provides funds towards monitoring & construction of the project. NMDOT's prelim estimate at $4.093 million. Construction to start late 2022 calendar year.

This alignment study will lead to a most feasible route and a new PS&E will be developed for roadway design & construction.

This alignment study will lead into design once a feasible route has been evaluated and a new alignment has been approved for roadway design & construction. A new Right of Way will be required for new road alignment.

INDIAN ROADS RESERVATION PROGRAM
CSTIPS Module of ITIMS

CSTIP Report

The CSTIP report shows the full contents of one or more CSTIPS.
For example, if the report is requested for a particular reservation with a managing entity that also manages two other reservations, then projects for all three reservations are reported. This means that subtotal amounts are always correct, no matter what the filter might be. However, see the next remark on how to read subtotals.

The CSTIP Subtotal is the full total for values on the CSTIP.
The state subtotal is the sum of the values in the state and on the current CSTIP. This report does not show overall state totals.
The location subtotal is the sum of values for projects on a particular reservation and in a particular state. When a reservation lies in two states, project data for each part including the subtotal is presented in separate places.

Any type of CSTIP may be the subject of the report.
