David Singer
Environmental Program Manager,
I-70 Mountain Corridor Program
Colorado Department of Transportation
425B Corporate Circle, Suite 201
Golden, CO 80401

Dear Mr. Singer:

The Arapaho and Roosevelt Forests would like to thank the Colorado Department of Transportation (CDOT) for inviting Forest Service participation in the Traffic and Revenue Study's Context Sensitive Solutions (CSS) process.

We support the recommendation that will be made by the project team in the final report. However, we suggest that all stakeholder comments and input during the CSS process be recorded, as well. In the event that CDOT would ever reconsider or refine these alternatives, stakeholder comments and input from this CSS process should accompany other information from this Study that is available at that time. A new CSS process should also be part of any reconsideration or refinement of these alternatives in the future.

In addition, we also suggest that the stakeholder comments and input from this Study be included with "preliminary design, cost estimates, and modeling data…[which] will provide updated documentation for upcoming I-70 initiatives."

Sincerely,

for RON J. ARCHULETA
Acting Forest Supervisor
