Hi Jennifer,

I hope that you are doing well. I cannot express my appreciation for you enough. I have been travelling for the past few weeks, so I have been out of touch. To be honest, I have kind of walked away. I was blown away by some of the Commissioner's questions and concerns, to the point of creating issues. I am totally disheartened by this process, where I did have hope before. Its why I do not like politics. People create problems just to say they solved them. Our commissioners are too scared to do anything but what they have already done. It makes me sad and it makes me feel like my business just does not matter to this town or the state. My perspective obviously. I do not put any faith into this process anymore.

I did want to thank you for all your help and especially for your time. I wish there were more yous in our government. Anyway, if you ever do decide to come visit Lake City, let me know. It really is a great place.

Thanks,

Tracey [REDACTED]
