

Contractor Work Codes Key

Below is a list of the work codes by numerical number for the specific work categories prequalified general prime contractors use to identify the type of construction work their company specializes in performing. The work codes and associated work categories listed below are provided as a key to understand which areas prequalified general contractors have identified specializing in. The work code numbers a general prime contractor specializes in can be found under their company name and address on the Prequalified Contractor List posted on the Prequalified Contractors & Work Codes webpage.
