**Project: Preliminary and Final Design Roadway Design Services for I-25 Bridge Over Platte River**

**CDOT Project BR R-600-297 (16212) “Bronco Arch Bridge” CDOT Structure # F-16-DP**

**Public Notice for Professional Consultants**

The Colorado Department of Transportation (CDOT) intends to hire one (1) Professional Consultant for this Project. The selected Consultant will contract to provide project specific consultant services to include those specific services set forth below.

**DESCRIPTION:** Consultant services will consist of engineering design services related to the CDOT Project proposing to replace the existing I-25 bridge over the South Platte River (Bronco Arch Bridge, approximate milepost 210.53) in the City and County of Denver. This project is also proposing to improve the curve on the north side of the bridge (approximate milepost 210.65). The bridge design has been completed by CDOT Engineers. The proposed work is to study the alternatives for the curve improvement, and to design the roadway to match the proposed bridge and on and off ramps.

This Project-specific contract work will be done on an “as needed” basis. The term "as needed" means neither CDOT nor the consultant has an obligation under the contract unless and until a task order is issued. Contracts resulting from the Invitation for Consultant Services are considered a "pricing agreement". CDOT anticipates that the compensation format on this contract will be “cost plus fixed fee,” subject to further review by CDOT. Execution of the contract will be subject to the bid award for the above-mentioned construction project.

NOTE: For all agreements that include final design services (either Non-Project Specific Construction Engineering agreements or Project Specific agreements) consultants, and their sub consultants having more than a 20% share in the final design portion of the contract, shall not be able to compete for construction engineering services on the same job for which they are providing final design services. Consultants who perform preliminary design and environmental review services may continue with, or compete for, final design services.

**SPECIAL PROJECT REQUIREMENT:** All work is to be performed under the direction and supervision, appropriate to the task, of a Colorado-Licensed Professional Engineer, a Colorado-Licensed Professional Land Surveyor for Surveying services, a Colorado-Licensed Landscape Architect, a Certified Industrial Hygienist, or, as appropriate, any combination of the foregoing.
