| 1 | Team Qualifications | N/A | Does the Project Manager need to be a Licensed Professional Engineer? | Task 1, the US 36 Concessionaire oversight, the role of the Project Manager does not require a licensed Professional Engineer as long as the principal engineer is licensed. The proposed Project Manager would need detailed experience related to the SOW. Task 2 and 3 will require a licensed professional engineer's license for the engineering work (reports/designs). The team will need a QA review engineer for task 2 and 3 if the Project Manager is unlicensed. |
