

# OpenRoads Designer (ORD 10.10) for Roadway Fundamentals Learning Path

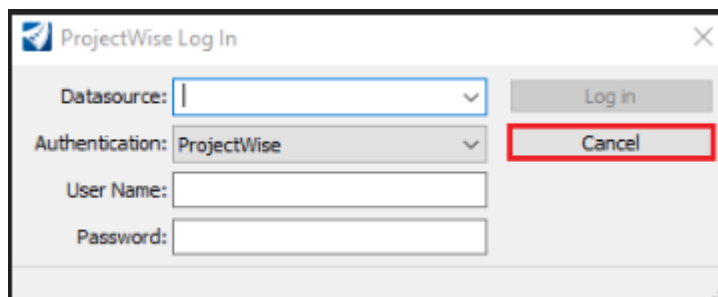

## Self-Paced Training

The Zip file contains 13 different modules using the Bentley Training and Examples workspace. Steps to take the ORD fundamentals course as follow:

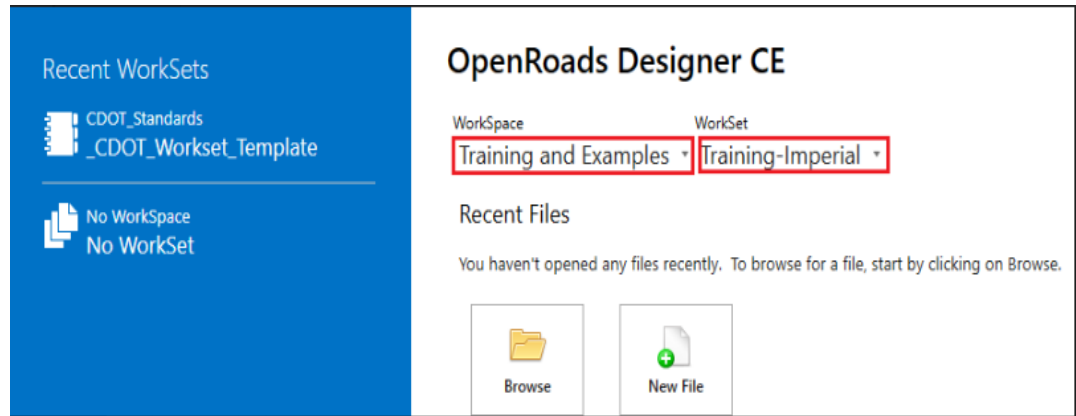

1. Extract the ZIP to your local computer under C:\ directory. The contents are shown below:

2. The contents of each folder will contain:
  - a. A PDF (Course guide Instructions)
  - b. DGN files (Imperial & Metric)
  - c. Other related materials
3. The training folders are numbered to help you walk through these modules in sequence.
4. Start OpenRoads Designer through the Start Menu on your computer or through a shortcut on your desktop or taskbar.
5. If prompted with a ProjectWise Log In, choose Cancel as shown:

6. Once you click cancel, OpenRoads Designer application will prompt you to set the workspace/workset. Select the following workspace/workset when the following page is invoked as shown below:

7. For each module, open and review the PDF training instructions PDF document that covers the steps/instructions on what DGN file to Open or Create.
8. Continue each module in sequence until you complete the course.
