

## MicroStation and InRoads

### *Requesting a new Level or Feature*

**Did you know** that if you want to request a new level or feature in the CDOT Configuration, you should go to the CADD Support Tab on this Web Page, select a topic from the CADD Support pull-down and choose "Add a Level or Add a Preference". This will open up an email that will allow you to fill in the appropriate boxes and then send it off to the CADD Manager.
