(303)757-9040
FAX (303)757-9868

DATE: July 29, 2011

TO: All Holders of Standard Special Provisions

FROM: Larry Brinck, Standards and Specifications Engineer

SUBJECT: Revision of Section 106, Hot Mix Asphalt - Verification Testing

As of this date, our unit is issuing a new standard special provision, Revision of Section 106, Hot Mix Asphalt - Verification Testing. This new standard special provision is 2 pages long. It should be used on projects having more than 5000 tons of Hot Mix Asphalt (HMA) when acceptance is based on gradation, asphalt content, and in-place density. This standard special is required on appropriate projects that will be advertised on or after August 25, 2011. Feel free, however, to use it on projects advertised before this date.

This new standard special provision is a reissuance of a standard special having the same title, dated August 1, 2005. It defines a uniform method to verify that field produced HMA conforms to the approved mix design.

Those of you who keep books of Standard Special Provisions should add this new one to your file. We have attached a new Index of Standard Special Provisions dated January 17, 2008 for your reference.
