

Memorandum

Date: August 9, 2024

To: All Holders of Standard Special Provisions

From: Michele Kayen, Specifications Engineer

Subject: Issuance of the 2024 Standard Specifications for Road and Bridge Construction book.

The CDOT Standards and Specifications Unit is delaying publishing the 2024 edition of the Standard Specifications for Road and Bridge Construction book. We are changing our publishing schedule from digital online in August, effective October 1, to digitally available the first week of May, effective the following July 1. This will be our new “normal” schedule.

Due to this change, the Spec book will be labeled the “**2025 Standard Specifications for Road and Bridge Construction**” book, when it comes out. This version will be fully electronic, no hard copies will be printed. The electronic version will still be presented in a “hard copy” format, the pages will print the usual format for a three-ring binder, but it will need to be printed on an as needed basis.

The 2023 book will be in effect until July 1, 2025. It is available in PDF online here: <https://www.codot.gov/business/designsupport/cdot-construction-specifications/2023-construction-specifications/2023-specs-book>.

The 2025 specs book will be used on all CDOT highway projects advertised on or after **July 1, 2025**.

If you have any questions or comments, please contact this office.
