This Environmental Product Declaration (EPD) reports the impacts for 1 m<sup>3</sup> of ready mixed concrete mix, meeting the following specifications:

- ASTM C94: Ready-Mixed Concrete
- UNSPSC Code 30111505: Ready Mix Concrete
- CSA A23.1/A23.2: Concrete Materials and Methods of Concrete Construction
- CSI Division 03-30-00: Cast-in-Place Concrete

**ENVIRONMENTAL IMPACTS** 

Mix 40VL30C6G • Denver Plant

Description: 4K 20% INT GENERAL

Declared Unit: 1 m<sup>3</sup> of concrete

Compressive strength: 4500 PSI at 28 days

**Declared Product:** 

**Product Components:** natural aggregate (ASTM C33), Portland cement (ASTM C150), batch water (ASTM C1602), fly ash (ASTM C618), admixture (ASTM C494)

Additional detail and impacts are reported on page three of this EPD

PCR/Standard(s) Used for EPD Development

ISO 21930:2017 Sustainability in Building Construction — Environmental Declaration of Building Products: serves as the core PCR

Third Party Reviewed? PCR for Concrete, NSF International, August 2021 v2.1 serves as the sub-category PCR

Sub-category PCR review was conducted by Thomas P. Gloria • Industrial Ecology Consultants

Independent verification of the declaration, according to ISO 14025:2006: ☐ internal ☑ external

Third party verifier Cara Vought (cara@sustainablesolutionscorporation.com) • Sustainable Solutions Corporation

# For additional explanatory material

Manufacture Representative: Dana Rotkovich (dana.rotkovich@burnco.com)

Software Tool: CarbonCLARITY Suite, EPD Generator • Verification

LCA & EPD Developer: Climate Earth (support@climateearth.com)

# LIFE CYCLE ASSESSMENT

### SYSTEM BOUNDARY

This EPD is a cradle-to-gate EPD covering the product stages (A1-A3) only

PRODUCTION Stage (Mandatory)		CONSTRUCTION Stage		USE Stage					END-OF-LIFE Stage				
Extraction and upstream production	Transport to factory	Manufacturing	Transport to site	Installation	esn	Maintenance	Repair	Replacement	Refurbishment	De-construction/ Demolition	Transport to waste processing or disposal	Waste processing	Disposal of waste
A1	A2	АЗ	A4	A5	В1	B2	ВЗ	B4	В5	C1	C2	СЗ	C4

### **CUT-OFF**

Items excluded from system boundary include: production, manufacture, and construction of manufacturing capital goods and infrastructure; production and manufacture of production equipment, delivery vehicles, and laboratory equipment; personnel-related activities (travel, furniture, and office supplies); and energy and water use related to company management and sales activities that may be located either within the factory site or at another location.

### **ALLOCATION PROCEDURE**

Allocation follows the requirements and guidance of ISO 14044.

The product category rules for this EPD recognize fly ash, silica fume and slag as waste products recovered materials and thus the environmental impacts allocated to these materials are limited to the treatment and transportation required to use as a concrete material input.

Denver Plant is a truck (transit) mixing plant. 30% of all mixing truck(fleet) energy has been allocated to module A3.

# LIFE CYCLE INVENTORY (LCI)

This EPD was calculated using industry average cement data. Cement LCA impacts can vary depending upon manufacturing process, efficiency and fuel source by as much as 50% for some environmental impact categories. Cement accounts for as much as 87% of the impacts of the concrete mixes included in this EPD and thus manufacturer specific cement impacts could result in variation of as much as 43%.

### PRIMARY SOURCES OF LCI DATA

- Admixture (plasticizing): EFCA EPD, 2015
- Aggregate (natural): US-EI (2016): "Gravel, round, at mine/US", 2001
- Cleaning Chemicals: Ecoinvent 3.4: 50% Citric acid and 50% Phosphoric acid, industrial grade, without water, in 70% solution state, market for/GLO, 2017
- Diesel: USLCI: "Diesel, combusted in industrial equipment/NREL/US", 2007
- **Electricity (WECC)**: Ecoinvent 3.4: "Electricity, medium voltage, market for, cut-off", 2015
- Ry ash: byproduct of coal combustion; no upstream manufacturing impacts
- Municipal Water: US-EI (2016): "Tap water, at user/US", 2000
- Natural gas: USLCI: "Natural gas, combusted in industrial boiler/NREL/US", 2007
- Non-Hazardous Solid Waste: US-El (2016): Disposal, municipal solid waste, 2008
- Oils, Lubricants and Greases: Ecoinvent 3.4: Lubricating oil, GLO, market for, cut-off, 2011
- Portland cement: Portland Concrete Association, Industry Average EPD, 2021
- Rail transport: USLCI: "Transport, train, diesel powered NREL/US", 2007
- Truck transport: USLCI:"Transport, combination truck, long-haul, diesel powered/tkm/RNA", 2010
- Truck transport: USLCI:"Transport, combination truck, short-haul, diesel powered/tkm/RNA", 2010
