COLORADO COST DATA

FOREWORD

The Colorado Department of Transportation's Engineering Estimates and Market Analysis (EEMA) Unit, of the Agreements and Market Analysis Branch, publishes the Cost Data Book annually. A joint effort has been made between the Department's sections and the EEMA Unit to gather and record cost data for this publication.

The following data includes weighted average prices for items on highway construction projects that were bid during the 2007 calendar year. Caution should be used in applying these historical averages to specific projects. Allowances for varying geographic, climatic, social, economic conditions and type of project should be made.

Changes and improvements are continually being made to update and increase the usefulness for future issues. Comments and suggestions for improvements for users of this publication are welcome. A copy of this book is also available on CD-ROM upon request.

**Copies of publications may be obtained
