Description of the product: (Include specific quantifiable details from tech data sheet. Advertising generalities are not appropriate.)

Avery Dennison's W-11000 is a full-cube retroreflective sheeting that exceeds ASTM D 4956 Type XI and IX requirements. W-11000 Pre-striped Barricade Retroreflective Sheeting is a premium option in barricade sheeting.

Avery Dennison W-11000 Prestriped Retroreflective Barricade Sheeting Series is available in White/Orange stripes at 45 degree diagonal alternating stripes. W-11000 is available in a variety of combinations which include 4" and 6" stripes, as well as left and right patterned stripes.

It has also successfully completed testing on the National Transportation Product Evaluation Program (NTPEP).

Restrictions, (installation and/or use):

Use of the product, (be specific to CDOT highway activities only):
It is designed to use for Construction workzone and Temporary Signage Applications for example closing a side walk or multilane highway.

Benefits to CDOT, (how will your product enhance quality, improve safety, save money, be a better value then other manufacturer's products):
t provides superior reflectivity and durability to handle the toughest road way conditions. The full-cube prism design of this product will allow for maximum retroreflectivity of light, providing construction work-zones with brighter barricades.
