Description of the product: (Include specific quantifiable details from tech data sheet. Advertising generalities are not appropriate.)

A blanket featuring 100% excelsior fill. This material is evenly distributed through the blanket and bound using a biodegradable stitch between two biaxially oriented jute nettings. This product is 100% biodegradable including fill, netting, and stitching thread. The product is applicable for both slope and channel applications.

Restrictions, (installation and/or use):

Not for permanent use

Use of the product, (be specific to CDOT highway activities only):

Use for erosion control measures in both slop applications and channel applications.

Benefits to CDOT, (how will your product enhance quality, improve safety, save money, be a better value then other manufacturer's products):

Provides additional blanket alternatives to the state of Colorado. This in turn helps save the state money by more competitive bidding opportunities.
