Description of the product: (Include specific quantifiable details from tech data sheet. Advertising generalities are not appropriate.)

Davis Colors - powder admixtures are high quality iron oxide pigments used in decorative or colored concrete. Davis Colors supplies ready to use color blends that are blended together using 4 primary colors. Light Red , Medium Red , Yellow and Black .

We also make our Chameleon Liquids and Granufin Pigments from these same primary pigments.

The iron oxides used to create the Davis Colors line of pigments meets or exceeds ASTM Specification C-979 - Pigments for integrally Colored Concrete.

Restrictions, (installation and/or use):

Calcium Chloride accelerators should not be used in colored concrete. Concrete materials, W/C ratio, and finishing may affect the final color of the concrete.

Use of the product, (be specific to CDOT highway activities only):

May be used in concrete applications such as roads, sidewalks, and precast.

Benefits to CDOT, (how will your product enhance quality, improve safety, save money, be a better value than other manufacturer's products):
