Description of the product: (Include specific quantifiable details from the tech data sheet. Advertising generalities are not appropriate.)

SIL-GUARD™ WB is a permanent (non-sacrificial) single coat anti-graffiti protective coating suitable for use over metal, concrete, brick, stone, wood, fiberglass, and pre-existing coating. SIL-GUARD™ WB can be applied directly to most existing graffiti and protect against future graffiti. This water-based silicone latex provides excellent durability and a long service life. SIL-GUARD™ WB forms a chemical bond directly with the host surface to enhance adhesion properties without the need for abrasive blasting, priming, and/or extensive site preparation. With this coating being hydrophobic, most graffiti will easily be removed with water at a lower pressure. (1200 psi)

Restrictions, (installation and/or use):

Application Temperature Range: 41-140 F

Use of the product, and Benefit to CDOT (be specific to CDOT highway activities only):

Acceptable applications include: concrete barriers, sound walls, bridges, slope paving, barrier walls, bridge abutments, and structural supports.
