

Pre-Approved Product Evaluation Request & Summary

Product Evaluation Coordinator
Colorado Department of Transportation 4670 North Holly Street
Denver, Colorado 80216

APL Reference No.

5933-25

Material Code

711.03

Material Code description full name

Concrete, Admixture

Part 1

Product Name:

Dynamon Easy 75

Product category:

Concrete\Admixture\Water Reducing,

Product Representative / Distributer (name & address):

Adrian Milewski

Description of the product: (Include specific quantifiable details from the tech data sheet. Advertising generalities are not appropriate.)

Dynamon® Easy 75 is a normal-setting, multi-range, water-reducing admixture for concrete. By varying the dosage rate, it can be used as a normal or mid-range, water-reducing admixture. It improves the quality of concrete by decreasing the ratio of water to cementitious material. Dynamon Easy 75 is designed specifically for concrete that requires power troweling and is a perfect solution for any slabs. However, it can be used for any application where improved concrete aesthetic performance is required. Dynamon Easy 75 conforms to ASTM C494 Types A and F as well as CSA A23.1.

Restrictions, (installation and/or use):

Dynamon Easy 75 can be stored for 1 year in sealed containers. Dynamon Easy 75 may freeze at temperatures below 32°F (0°C). Although freezing does not harm Dynamon Easy 75, precautions should be taken to protect it from freezing. If it should freeze, thaw and reconstitute it with mechanical agitation. Do not use pressurized air for agitation.

Use of the product, and Benefit to CDOT (be specific to CDOT highway activities only):

Increased workability and finishability without extending set times, even in mixes with reduced amounts of cementitious material including Portland-limestone (Type 1L) cement
