REVISION OF SECTION 202
REMOVAL OF COMPRESSION JOINT SEALER

Section 202 of the Standard Specifications is hereby revised for this project to include the following:

DESCRIPTION

This work shall consist of removing existing elastomeric compression seals in existing bridge or bridge approach slab joints, in accordance with the applicable portions of Section 202 of the Standard Specifications or as amended by these Special Provisions and in conformity with the plans or as directed by the Engineer.

CONSTRUCTION REQUIREMENTS

At least 10 working days before beginning removal, the Contractor shall submit a method statement to the Engineer with details of the removal operations including the means, methods, sequence of removal, tools, and equipment to be used. All removal operations, methods and equipment must be approved by the Engineer before the work begins.

The Contractor shall take all steps necessary to minimize spalling on the face of the existing concrete adjacent to the removal boundaries and to avoid damage to the existing bridge deck and approach slabs. Any damage caused by the Contractor to any portion of the structure not intended for repair shall be repaired in kind by the Contractor at the Contractor’s expense with no allowance for contract time extension.

The Contractor is responsible for the disposal of all removed material and debris.

METHOD OF MEASUREMENT

Removal of Compression Joint Sealer will be measured by the actual quantity removed and accepted, from face of curb to face of curb along the joint.

BASIS OF PAYMENT

The accepted quantities of Removal of Compression Joint Sealer will be paid at the contract unit price.

Payment will be made under:

<table>
<thead>
<tr>
<th>Pay Item</th>
<th>Pay Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Removal of Compression Joint Sealer</td>
<td>Linear Foot</td>
</tr>
</tbody>
</table>

Payment for Removal of Compression Joint Sealer will be full compensation for all labor, materials, tools, equipment and incidentals necessary to complete the item including saw cutting, removal of concrete as designated in the plans, removal of compression joint sealers, sandblasting or hand cleaning concrete surfaces, and disposal of removed materials and debris.

INSTRUCTIONS TO DESIGNERS (delete instructions and symbols for final draft):

Use this project special provision for removal of compression joint sealers that do not require steel armoring removal and will be replaced with a new Compression Joint Sealer.

If armoring is present and requires removal at the existing compression joint sealer, use Revision of Section 202 Removal of Expansion Device.
