**Region 3:**

This request is to establish the design phase budget for this structure replacement project. The project will be procured using Construction Manager/General Contractor (CM/GC) contracting. The design estimate includes funding for design, Construction Manager (CM), and Independent Cost Estimate (ICE) contracts. This structure is located between Silverthorne and the Eisenhower-Johnson Memorial Tunnels (EJMT) facility and was previously funded by BE for a feasibility study in July 2018.

This request is based on the project engineer’s analysis of the level of effort needed to accomplish the design. The final scope of work may vary since the project is still in the preliminary design phase. Any budget savings in this phase will be released and made available to other project phases or other projects. The existing deficient structure is a top tier candidate bridge in the July 2019 BE Prioritization Plan. A summary of the current project budget, including the pending requested action, is provided for information below.
