**RE: U.S. 36 Managed Lanes Project – Proposed Toll and Penalty Schedule**

Dear Nicholas,

Please review the Proposed Toll and Penalty Schedule. It has almost been 2 years since the toll rates for U.S. 36 Phase 1 were established and the I-25 Central toll rates were adjusted. U.S. 36 Phase 2 toll rates have also been in place for over a year. If approved, the proposed changes will be implemented on July 1, 2017.

Generally, the proposed changes are an increase of \$0.10 for off-peak Automated Vehicle Identification (AVI) customers on U.S. 36. U.S. 36 peak AVI rates generally increase between \$0.15 and \$0.35, but in some locations the peaks will be lowered between \$0.10 and \$0.60 to respond to recent traffic volume. The tolls will also change at slightly different times of day from when they were first established in order to respond to recent traffic volumes.

Generally, the proposed changes are an increase of \$0.15 for off-peak Automated Vehicle Identification (AVI) customers on I-25 Central. I-25 Central peak AVI rates generally increase between \$0.30 and \$0.45 to respond to recent traffic volume. The tolls will also change at slightly different times of day from when they were last modified in order to respond to recent traffic volumes. Also, due to operational efficiencies gained in reversing the I-25 Central lanes, the I-25 Central lanes will remain open in the southbound direction one hour longer and now will close at 11:00 AM. RTD has reviewed this concept and endorses the change. From time to time, longer closures will be needed for operations and maintenance and they will be coordinated in advance with CDOT, HPTE, and RTD.

The maximum price for an AVI trip from Boulder to downtown Denver will be \$8.35 in the morning, down from \$8.75. The maximum price for an AVI trip from downtown Denver to Boulder in the afternoon will be \$8.05, up from \$7.30. Both of which are well below the maximum of \$15.48.

Generally, License Plate Tolls on both U.S. 36 and I-25 Central will have a surcharge which is calculated in the same manner HPTE uses. The surcharge will vary based on the AVI amount and time of day. The surcharge will vary between \$1.05 and \$1.70 on U.S. 36. The surcharge on I-25 will vary between \$1.80 and \$4.90.

The information provided is in accordance with the Concession Agreement Schedule 16, Section 1.2, 2.1, 2.2, and 2.3. We request HPTE respond in accordance with Concession Agreement Schedule 16 Section 2.4 (b).

Respectfully,

**RE: U.S. 36 Managed Lanes Project –U.S. 36 and I-25 Managed Lanes Proposed Toll and Penalty Schedule**

Dear Nicholas,

Enclosed please find our Proposed Toll and Penalty Schedule for your review in accordance with the Concession Agreement Schedule 16, Section 1.2 and 2.1. We request to implement these changes starting on July 1, 2017.

**2. Establishment of and Changes to Established Toll and Penalty Schedule**

**2.1. Every Proposed Toll and Penalty Schedule that proposes to establish or modify Tolls shall include:**

(a) *All data necessary for HPTE to consider the Proposed Toll and Penalty Schedule for adoption as the Established Toll and Penalty Schedule. Each Proposed Toll and Penalty Schedule shall include:*

***(i) The Proposed Algorithm***

Tolls will be charged based on Variable methodology consistent with the current regime, and not on a software based algorithm. As a result there is no new proposed algorithm.

***(ii) Tolls to be charged to Tolloed Vehicles using the Managed Lanes, or any portion thereof, while using an electronic, automated system enabling the ETCS to recognize the Motor Vehicle by means other than imagery, including Transponders (in each case a using a Vehicle Recognition System (VRS)), which in all cases must be Dynamic Tolling***

ExpressTolls: Passenger Vehicle Tolls

At this time, we are requesting to implement the ETCS Automated Vehicle Identification (AVI) (a.k.a, ExpressToll) rates, which are as set out in the attached Table 1 and Table 2.

***(iii) Tolls to be charged to Tolloed Vehicles using the Managed Lanes, or any portion thereof, without using a Vehicle Recognition System (VRS)***

Vehicles without VRS: License Plate Tolls (LPT) Passenger Vehicle Tolls

The attached Table 3 and Table 4 depict LPT rates to be charged to Managed Lane users that do not use a transponder (switchable or fixed) to communicate with the VRS.

***(iv) Tolls to be charged to Motor Vehicles that are not Passenger Vehicles***

**U.S. 36 & I-25**

Non-Passenger Vehicles (defined as vehicles with four or more axles) will continue to be charged a \$25.00 premium per gantry on the applicable gantry Passenger Vehicle Toll.

- (b) *A statement (if it is the case) that the Proposed Toll and Penalty Schedule is a remedial adjustment to the Established Toll and Penalty Schedule which the Concessionaire considers to be necessary to correct a Bus Delay Event, an error, or some other unintended consequence of that Established Toll and Penalty Schedule;*

**U.S. 36 & I-25**

This proposed Toll and Penalty Schedule is not a remedial adjustment to correct a Bus Delay Event, an error, or some other unintended consequence. It is the first rate revision for U.S. 36 and 2 years since Phase 1 has been opened.

- (c) *A statement providing the highest and lowest Tolls that are proposed to be charged for each of the Tolls described in paragraphs 2.1(a)(i), 2.1(a)(ii), 2.1(a)(iii), and 2.1(a)(iv);*

For paragraph 2.1(a)(i)(ii), 2.1 (a) (iii) please refer to the attached tables where the highest ETCS AVI toll rate (Tables 1 – 2) or highest LPT (Tables 3-4) for each segment and direction is highlighted in red and lowest ETCS AVI toll rate (Tables 1 – 2) or lowest LPT (Tables 3-4) for each segment and direction is highlighted in green.

For paragraph 2.1(a)(iv), the Non-Passenger Vehicle premium is proposed continue to be \$25 per gantry.

- (d) *If any of the Tolls described in paragraphs 2.1(a)(i), 2.1(a)(ii), 2.1(a)(iii), or 2.1(a)(iv) contain the right for the Concessionaire to manually override the Proposed Algorithm, a schedule of what specific Tolls will be if manually overridden, a description of when and on what terms the Tolls may be overridden, and a range of what the manually overridden Tolls will be;*

As we are not at this time utilizing an algorithm, there is no algorithm for us to override. The only manual change to the system would be to either reduce the toll rates or waive toll revenues during time periods requested by emergency services. This is consistent with the existing protocol and we are not requesting any changes to this at this time.

- (e) *An explanation of the changes between the Proposed Toll and Penalty Schedule and the current Established Toll and Penalty Schedule, including why the changes are being proposed;*

The proposed changes to ETCS AVI (ExpressToll) rates (as detailed in Tables 1-2) and LPT (as detailed in Tables 3-4) are being made in continuing efforts to balance traffic and lane flow to ensure we meet our commitments to the Managed Lanes Goals, RTD, to account for inflation and an increase in Value of Time. The Managed Lanes Goals are defined in the Concession Agreement Schedule 16; Section 1.3 and are as follows:

*Concessionaire acknowledges and agrees that all Established Toll and Penalty Schedules must be designed to ensure that Motor Vehicle speeds (a) For the portion of the US 36 Managed Lanes from Table Mesa to the Broomfield Park-n-Ride are an average of 55 miles per hour; (b) For the portion of the US 36 Managed Lanes from the Broomfield Park-n-Ride to Pecos Street are an average of 50 miles per hour; and (c) For the portion of the Managed Lanes from Pecos Street to Denver Union Station, that they maintain a travel time of no more than 8.75 minutes. In all cases during Peak Periods only (collectively, the “Managed Lanes Goals”).*

- (f) *The Concessionaire's good faith estimate, on a semi-annual basis, for as long as an effect persists, of incremental difference between the Toll Revenues generated under the Established Toll and Penalty Schedule and the Proposed toll and Penalty Schedule once Toll Revenues are being generated in accordance with the Proposed Toll and Penalty Schedule.*

**U.S. 36 and I-25:**

The Proposed toll and Penalty Schedule, along with our traffic and revenue model, leads us to believe that toll revenues will increase approximately \$3.09 million for the final 6 months of 2017. \$1.92 million are estimated to be generated through I-25 and \$1.17 million are estimated to be generated through US-36. We believe that the proposed toll and penalty schedule will respond to driver behavior that was previously unknown, when original rates were established for US36 and has changed over time on I-25, and will better align with the public's value of time.

Respectfully,

**PLENARY ROADS DENVER, LLC**
