2.0	Operational Incidents	6
3.0	Non Compliance Reports for Maintained Elements	6
4.0	Customer Relations Activities	6
5.0	Traffic Reports.....	8
6.0	Quality Conformance Summary.....	8
7.0	Environmental Monitoring Activities.....	8

INTRODUCTION

This quarterly report draws upon data from April 1 – June 30, 2014. The purpose of the report is to provide an overview of operational performance and key events for the reporting period. This will cover items such as traffic reports, customer service levels, environmental monitoring activities and discussion of key events.

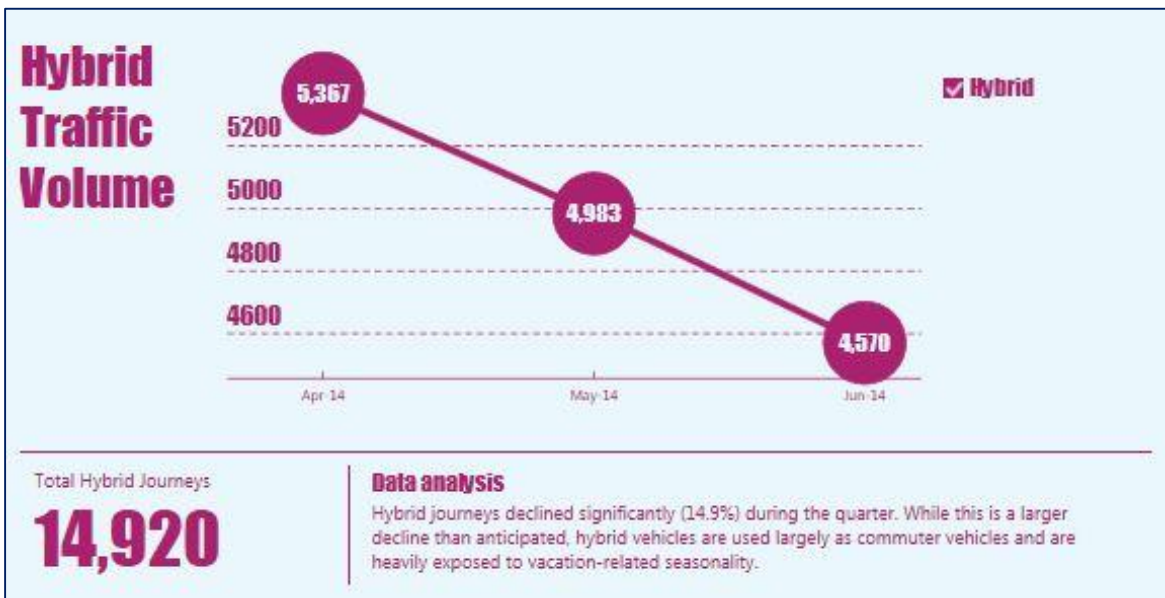

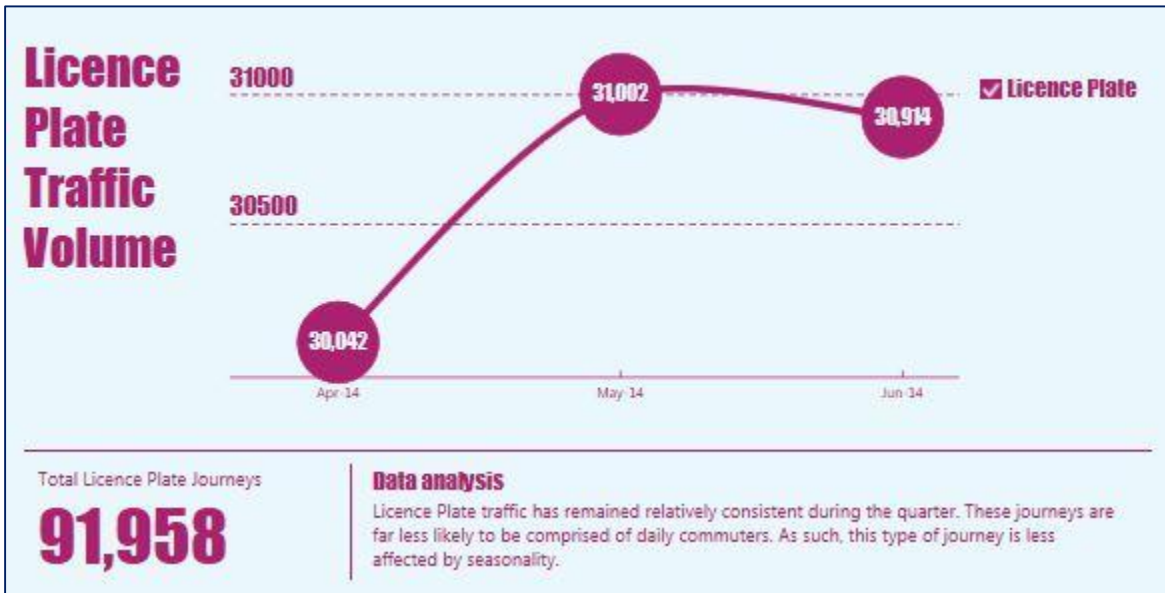

1.0 SUMMARY OF MANAGED LANES

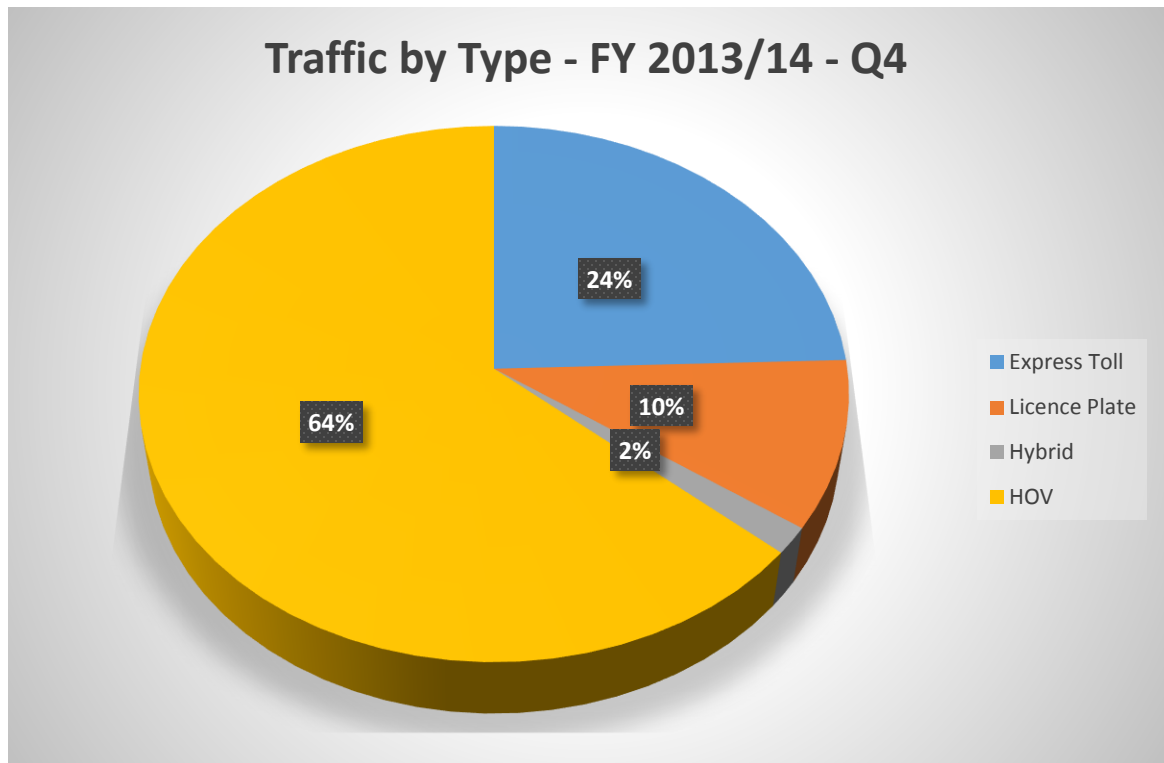

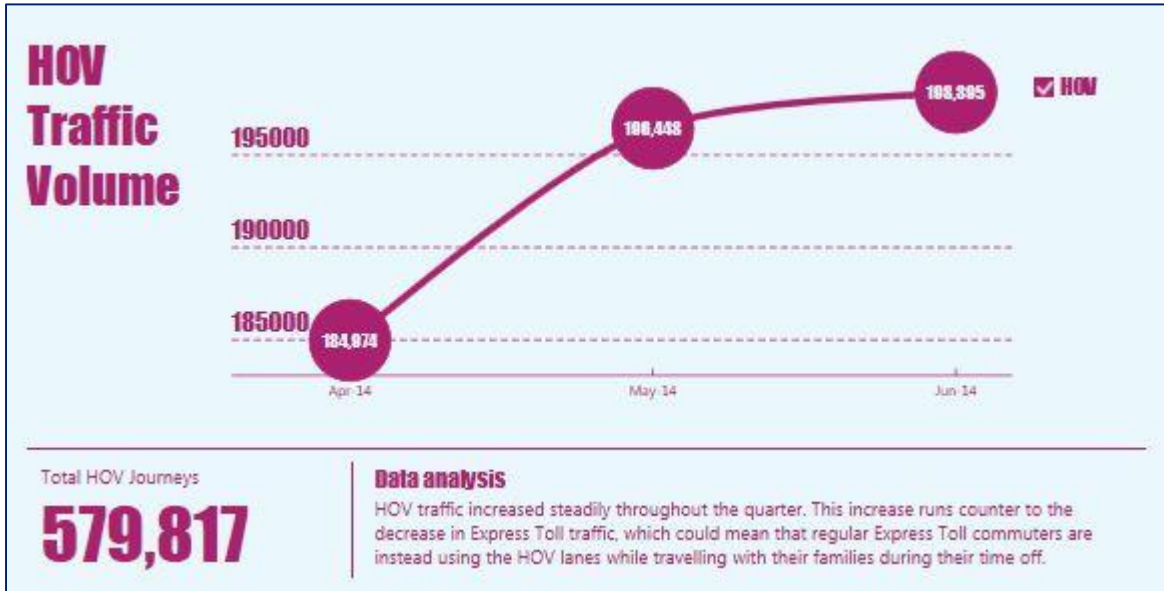

Historically, the fourth quarter of the fiscal year sees a decline in demand amongst the key Express Toll customer segment. The Express Toll segment is comprised largely of daily commuters, who begin to embark on summer vacations during May and June, thus reducing the number of Express Toll journeys on the Managed Lanes.

In contrast, the amount of HOV journeys typically increase during this period as some of the vacationing Express Toll customers return as HOV customers with their families during their time off.

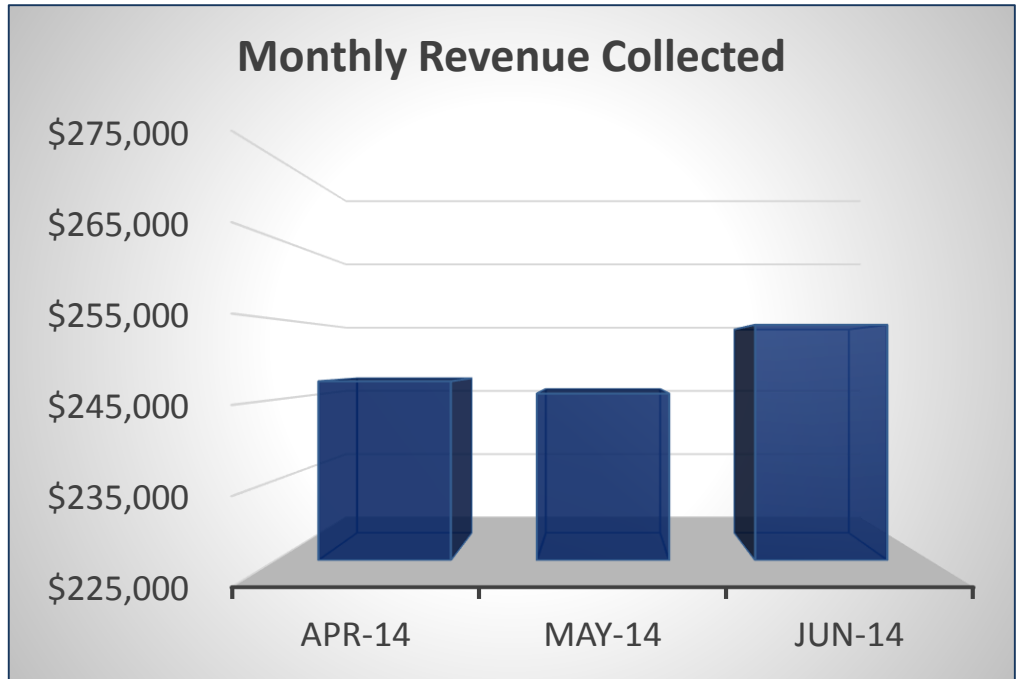

Detailed graphs and charts depicting the trends in traffic volume throughout the quarter are provided below.

The project collected \$747,281 in revenue from users of the Managed Lanes during the Quarter. It is important to note that this represents the amount of revenue collected during the period, and not the amount of revenue earned in the period. For example, License Plate transactions are normally paid several weeks after the journey has taken place. If a customer completes a license plate journey in June, but pays for it in July, that revenue would be included in July's report, not June's.

2.0 OPERATIONAL INCIDENTS

In the early morning hours of June 13, a post-mounted sign was struck by a vehicle and became semi-detached from its post, constituting damage to a Maintained Element. This was noticed during the morning lane closure and the sign was reattached to the post during the same closure.

There were no incidents requiring EMS response during the quarter.

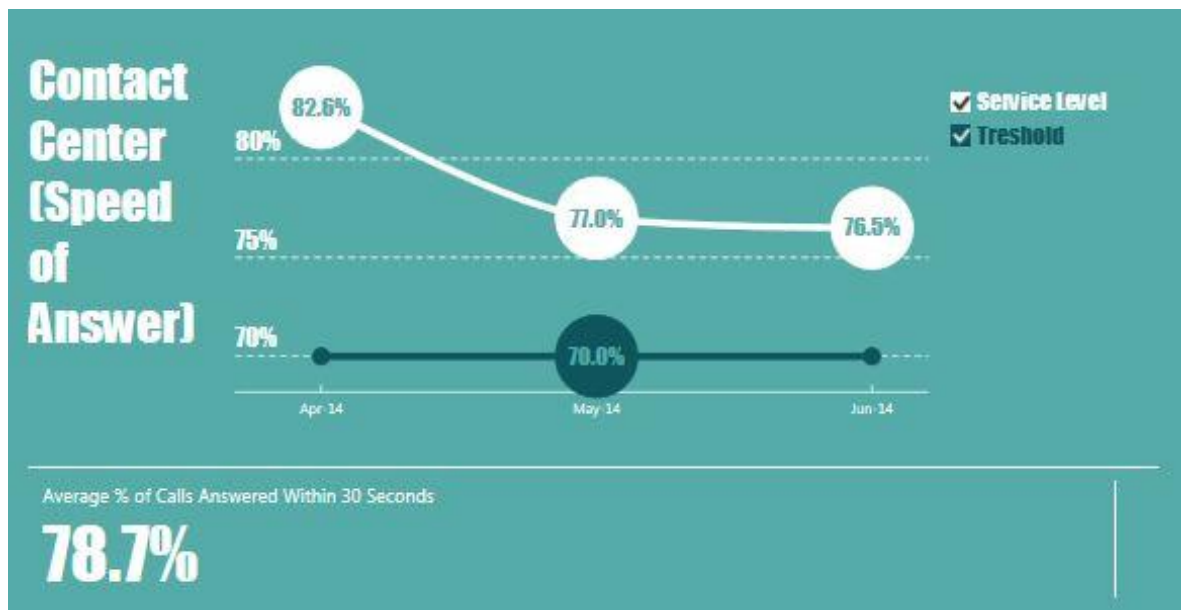

3.0 NON COMPLIANCE REPORTS FOR MAINTAINED ELEMENTS

Zero non-compliance penalties were reported during the quarter. All repairs and responses related to the Performance and Measurement Criteria Table of Appendix 6-1 were made within the allowable cure time. There are lighting-related repairs that are currently taking place and they are expected to be completed within the allowable cure time.

4.0 CUSTOMER RELATIONS ACTIVITIES

The E-470 contact center performed at a high level during the quarter, exceeding targets on all key metrics. In particular, the average speed of answer and customer satisfaction survey results performed well above targeted levels.

As our main point of contact with our customer base, the contact center’s performance is a key aspect of the overall project. We will continuously improve this service over the life of the project, building upon this initial success.

5.0 TRAFFIC REPORTS

For ease of use, a detailed breakdown of this quarter's traffic counts as been provided as Appendix A to this report.

6.0 QUALITY CONFORMANCE SUMMARY

The handover condition of the I-25 HOT/HOV lanes has been jointly inspected and evaluated by HPTE, PRD, and Transfield and numerous Category 2 defects have been identified. However, pursuant to CA Section 22.10, these Category 2 defects will be repaired as part of the I-25 Initial Work Package and non-compliance penalties do not apply. These joint inspections have replaced the Audit Inspections until the I-25 Initial Works package can be constructed. All parties are collaboratively defining the scope so that the defects can be corrected within a reasonable period. In the meantime, items pending the I-25 Initial Work Package are being maintained to the same or higher level as when the project commenced. Items that are not pending the I-25 Initial Work Package are being maintained per the performance criteria listed in Appendix 6-1 of Schedule 6.

7.0 ENVIRONMENTAL MONITORING ACTIVITIES

This quarter, Transfield gathered water samples from storm drains throughout the project and had them analyzed by a third-party laboratory. The lab results concluded that the water was non-hazardous and that sediment removed from the system could be disposed of at a landfill. A waste disposal profile was filed at the Waste Management facility in Bennett and is valid for three years. The lab results will be presented in the July Monthly Maintenance Report.

Operations – Quarterly Report, Q2 2014

US 36 and I-25 Managed Lanes Project

Revision	Date	Approved
Rev. 0	07/24/2014	

This report titled *Operations Quarterly Report, 2nd Quarter 2014* has been prepared by Transfield Services Infrastructure (TSI) for the exclusive use of Plenary Roads Denver, LLC (PRD). No other party is an intended beneficiary of this report or the information, opinions, and conclusions contained herein. Any use by any party other than PRD of any of the information, opinions, or conclusions is the sole responsibility of said party. The use of this report shall be at the sole risk of the user regardless of any fault or negligence of PRD or TSI.

The information and analyses contained herein have been completed to a level of detail commensurate with the objectives of the assignment and in light of the information made available to TSI at the time of preparation. This report and its supporting documentation have been reviewed and/or checked for conformance with industry-accepted norms. To the best of the information and belief of TSI, the information presented in this report is accurate to within the limitations specified herein.

This report is TSI pdf file: Operations Report Q2 2014.pdf. Any reproductions or modifications of this report are uncontrolled and may not be the most recent revision.

This Operations Quarterly Report contains the relevant information for the 2nd quarter of 2014 as required in Schedule 6, Section 1.8.2 of the Operating Contract. Transfield Services Infrastructure (TSI) continues ongoing and preventive maintenance activities for the I-25 Managed Lanes Project. Typical activities include reversible lane operations, courtesy patrol, maintenance patrols, graffiti removal, trash/debris removal, and pavement repairs.

Highlights this Quarter:

- **100% Level of Service “A” achieved for the 2013-2014 snow season**
- **Ongoing coordination with the I-25 North Project**
- **Lighting and power inspection completed**
- **No injury accidents**

A. Per Contract, Intentionally Deleted

B. Monthly Incident Reports – Q2 2014

There was one incident this quarter that resulted in damage to a Maintained Element. No incidents this quarter required emergency medical services.

#	Nature of Incident	Time	Date	Location	Parties Involved	Actions
1	HOV post mounted sign struck by vehicle.	Between 5:00AM and 10:00AM	6/13/2014	I25, MP 214.7	Unknown	Sign damage was noticed during the midday HOV closure. Sign panel was ok and was bolted back on the post during the same closure.

This data was retrieved from TSI’s Traffic Operations Center (TOC) dispatch logs and TSI maintenance staff patrol logs. TSI has reached out to Colorado State Patrol (CSP) and Denver Police Department (DPD) for accident reports and will make that information available in quarterly reports as it is received.

C. Non-Compliance Reports – Q2 2014

All repairs and responses related to the Performance and Measurement Criteria listed in Appendix 6-1 of the Operating Contract were made within the allowed cure time. Items that have repairs in progress are still within the allowed cure time.

D. Customer Relations Activities – Q2 2014

No complaints regarding the I-25 Managed lanes were received by TSI this quarter.

E. Per Contract, Intentionally Deleted

F. Quality Conformance Summary – Q2 2014

Representatives of HPTE, TSI, and Plenary conducted an inspection of the I-25 Managed Lanes Maintained Elements in July. The inspection generally followed the Audit Inspection guidelines in Section 2.3.6 of the Operating Contract. However, given that this portion of the project is still pending work related to the I-25 Initial Work Package, an Asset Condition Score could not be assessed. The following was concluded from the inspection:

- Items pending the I-25 Initial Work Package are being maintained to the same or higher level as when the project commenced.
- Items that are not pending the I-25 Initial Work Package are being maintained per the performance criteria listed in Appendix 6-1 of the Operating Contract.

G. Environmental Monitoring Activities – Q2 2014

This quarter TSI gathered water samples from storm drains throughout the project in June and had them analyzed by an outsourced laboratory. From the lab results, it was concluded that the water was non-hazardous and that sediment removed from the system could be disposed of at a landfill. A waste disposal profile was filed at the Waste Management facility in Bennett and is valid for three years. The lab results will be presented in the July Monthly Maintenance Report.

TSI inherited the project with many of the storm drains filled or nearly filled with sediment. TSI is currently evaluating means, methods, and responsibilities for cleaning the storm drains.

H. TIGER Performance Measure (per Exhibit 6.1) – Q2 2014

TIGER performance data is being maintained by PRD.
