

Colorado Historic Highway Inventory - Historical Summary and Evaluation of Significance

Highway Name: State Highway (SH) 368

CDOT Route Nos. and Milepost (MP) Limits:

<i>CDOT Route</i>	<i>Route Description</i>
368A	From SH 370-A south of Monte Vista south and east To SH 295-A south of Alamosa

Highway Location:

Counties: Rio Grande, Conejos, Alamosa
Length (Miles): 12.323

OAHP Site Numbers (for previously recorded segments, if applicable)*:

<i>OAHP Site No.</i>	<i>Assessment</i>	<i>Assessment Date</i>	<i>Site Name</i>
None	No previously recorded segments are found on or adjacent to this highway		

Discussion of Site Forms (for previously recorded segments, if applicable):

No Colorado Cultural Resources Inventory forms for previously recorded segments of this highway were identified in Compass.

Historic Districts located within 250 feet of highway (OAHP Site Number and Name)*:

<i>OAHP Site No.</i>	<i>District Name</i>	<i>Assessment (If Applicable)</i>
None	No historic districts are found on or adjacent to this highway	

**Information based on data from Compass provided by OAHP*

Colorado Historic Highway Inventory - Historical Summary and Evaluation of Significance

Highway Name: State Highway (SH) 368

Historical Data:

SH 368 is approximately 12 miles long and located in the San Luis Valley, southwest of Alamosa, in the south-central region of the state. The highway route is a stair-step pattern and extends west from its eastern terminus at U.S. Highway (US) 285, just north of Estrella, to its junction with SH 370.

The earliest transportation corridors in South-Central Colorado were wagon roads that often followed trails established by Native Americans. Settlers from New Mexico moved into the San Luis Valley in the 1850s and established early irrigation and water reclamation systems to aid in agricultural development. The San Luis Valley developed into a center for agriculture and livestock-raising within the region beginning in the mid-nineteenth century. (Carter and Mehls 1984: 46-48)

Railroad construction began in southern Colorado during the 1860s. The Denver and Rio Grande Railroad (D&RG) was organized in 1870 and construction on tracks south of Denver began that same year. The D&RG reached the San Luis Valley by 1877 and expanded throughout the valley over the next several decades; tracks reached Alamosa in 1878, a line was constructed from Alamosa to Espanola, New Mexico in 1880 and in 1881 tracks reached Del Norte. The San Luis Valley Southern Railroad was constructed between Monte Vista and Center in 1913. Railroads served as an important means for distributing livestock and agricultural products produced in the San Luis Valley. (Carter and Mehls 1984: 46-48, 79-81)

The popularity of the automobile increased dramatically between 1910 and 1920. The Good Roads Movement and establishment of the Colorado Highway Commission in the first decades of the twentieth century led to the establishment of a highway network throughout the region and state. Smaller communities increasingly saw the benefits of highway access, which led to further highway construction along less traveled routes in the 1920s and 1930s. US 160 became the major east-west route through the San Luis Valley in the 1930s by providing connections to SH 17, US 285, and many smaller and less prominent north-south routes that comprised the local transportation network. (Carter and Mehls 1984: 138-141) SH 368 was not designated a state highway until 1939 and extended west from US 285 to SH 15, in a single stair-step pattern. By 1954, the route was realigned to its current alignment with two stair-steps and its western terminus at SH 370. The entire route was paved by 1958. The highway was one of many short area roads that formed the area transportation network between La Jara, Monte Vista, and Alamosa.

State highways, farm-to-market roads, and small local connector roads like SH 368 typically served to link more remote areas with the major regional transportation corridors, towns, and cities. Research and review of historic mapping indicates that this highway had no important association to historic themes within the state and region nor did it provide direct access to destinations associated with important trends or events. Within the context of the region, SH 368 served as a minor connector road and functioned as one of many highways that comprised the local and regional transportation network.

(Unless otherwise indicated, sources used in the preparation of this section included state highway maps, the Highways of Colorado by Matthew Salek, Highways to the Sky: A Context and History of Colorado's Highway System, Colorado State Roads and Highways, National Register of Historic Places Multiple Property Submission, plans in the Online Transportation Information System (OTIS), and site forms for previously surveyed resources in Compass when available.)

Colorado Historic Highway Inventory - Historical Summary and Evaluation of Significance

Highway Name: State Highway (SH) 368

Not Significant - No historical significance identified

Significant - Historical significance identified (see details below)

Property Type and Areas of Significance:

A detailed explanation why this highway possesses historical significance is provided in the Significance Statement below.

Cultural:

Criterion A specific requirements

- Early and/or prominent project of the Colorado Highway Department (Transportation)
- Association with a significant event (If applicable, the Area of Significance is indicated in the statement of significance below)
- Association with federal work relief programs (Politics/Government)

Criterion C specific requirements

- Representative example (Transportation)

Engineering:

Subtypes

- Farm-to-Market Road
- Limited Access, Multiple-Lane, Divided Highway/Freeway
- Highway Bypass

Criterion A specific requirements

- Early and/or prominent project of the Colorado Highway Department (Transportation)
- Association with a significant event (If applicable, the Area of Significance is indicated in the statement of significance below)
- Association with federal work relief programs (Politics/Government)

Criterion C specific requirements

- Representative example (Transportation)
- Engineering achievement (Engineering)

Aesthetic:

Criterion A specific requirements

- Early and/or prominent project of the Colorado Highway Department (Transportation)
- Association with a significant event (If applicable, the Area of Significance is indicated in the statement of significance below)
- Association with federal work relief programs (Politics/Government)

Criterion C specific requirements

- Representative example (Transportation)
- Engineering achievement (Engineering)
- Landscape architecture (Landscape Architecture)

Colorado Historic Highway Inventory - Historical Summary and Evaluation of Significance

Highway Name: State Highway (SH) 368

Historic periods of highway construction:

- Pre-territorial (pre-1861)
- Territorial and pre-automobile state roads (1861-1890)
- Automobile age (1890-1930)
- Depression and World War II (1930-1945)
- Postwar Interstate Era (1945-1973)
- Completion and Augmentation of Interstate System (1973-2000)

Level of Significance:

- Local
- State
- National

Significance Statement:

SH 368 is classified as an Engineered Route under the classification system in the MPS.

Criterion A

SH 368 was constructed relatively late within the context of highway development and is neither an example of an early or prominent project by the Colorado Highway Department (CHD) nor was it built or improved as part of a Depression-era federal work relief project. Historically, SH 368 served to provide typical connections to other state roads and county roads to common local and rural regional destinations. The highway did not function as a main transportation route for providing direct connectivity as a farm-to-market road between an important agricultural region and its market. As such, it does not possess significance under Criterion A.

Criterion B

Research did not reveal this highway to be directly associated with the events or work of a person important in history, nor does research indicate the highway represents the efforts of a specific individual to secure construction of this highway for the economic development of a community or area of the state. Therefore, this highway does not possess significance under Criterion B.

Criterion C

This highway is not considered to be an early or prominent project of the CHD. Research and literature review yielded no evidence to indicate the use of innovative or important engineering design or construction techniques that serve to distinguish this highway from other roads and does not appear to exhibit important engineering innovations or important later modifications. The highway's design and construction appear to fall within the established standard practices of state highway design and construction of the time and the highway does not possess significance under Criterion C.

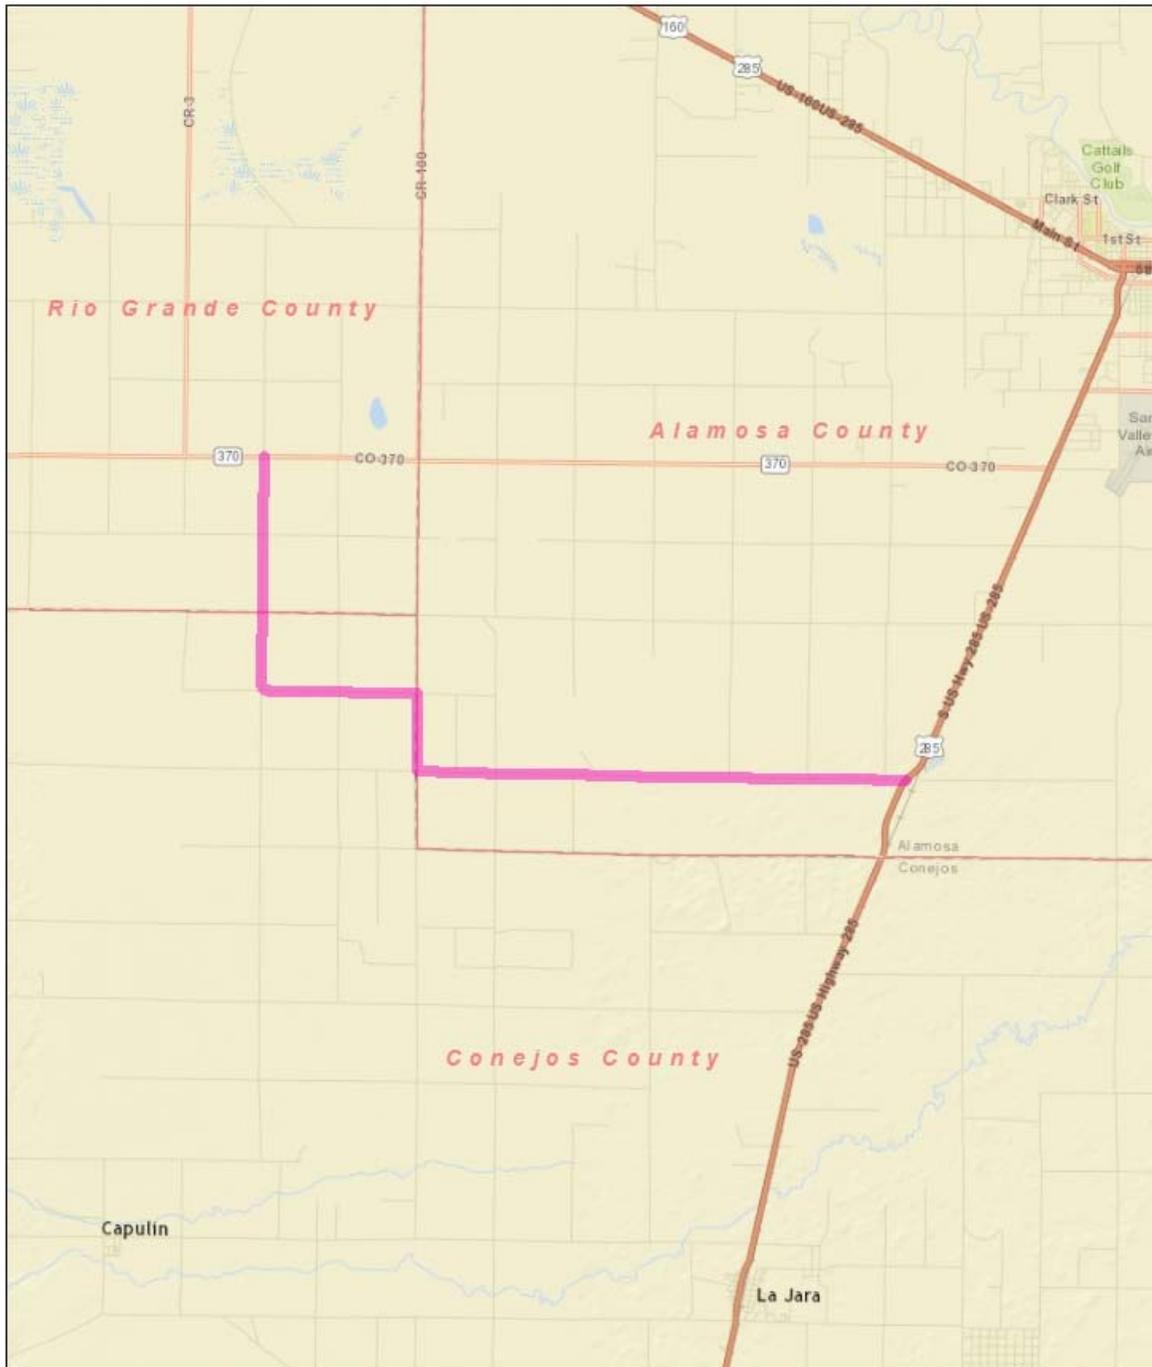

Criterion D

For a property to possess significance for information potential, the information yielded by the property must answer specific important research questions that cannot be otherwise answered. The technology of highway construction is well understood and documented. As such, this highway is unlikely to yield important information that cannot be discerned from archived plans and other records. Therefore, this highway does not possess significance under Criterion D.
