

Colorado Historic Highway Inventory - Historical Summary and Evaluation of Significance

Highway Name: State Highway (SH) 57

CDOT Route Nos. and Milepost (MP) Limits:

<i>CDOT Route</i>	<i>Route Description</i>
057A	From The South Side Ramps at I 70-A South of Stratton North via Stratton To Jct U.S. 24-C East of Stratton

Highway Location:

Counties: Kit Carson
Length (Miles): 0.506

OAHP Site Numbers (for previously recorded segments, if applicable)*:

<i>OAHP Site No.</i>	<i>Assessment</i>	<i>Assessment Date</i>	<i>Site Name</i>
None	No previously recorded segments are found on or adjacent to this highway		

Discussion of Site Forms (for previously recorded segments, if applicable):

No Colorado Cultural Resources Inventory forms (forms) for previously recorded segments of this highway were identified in Compass.

Historic Districts located within 250 feet of highway (OAHP Site Number and Name)*:

<i>OAHP Site No.</i>	<i>District Name</i>	<i>Assessment (If Applicable)</i>
None	No historic districts are found on or adjacent to this highway	

**Information based on data from Compass provided by OAHP*

Colorado Historic Highway Inventory - Historical Summary and Evaluation of Significance

Highway Name: State Highway (SH) 57

Historical Data:

SH 57 is approximately one half mile in length and is located on Colorado's eastern plains. The highway serves as a short business spur off of Interstate (I)-70 and ends at its intersection with U.S. Highway (US) 24 in Stratton. Colorado's eastern plains are dotted with small farming communities such as Stratton, which is an agricultural community surrounded by ranches and farms.

Colorado's eastern plains were historically traversed by several prominent trails including the Oregon Trail, later renamed the Overland Trail, located between Julesburg and Wyoming via Fort Collins; the Old Cherokee Trail, a branch of the Santa Fe Trail in the southern part of the region; and the three branches of the Smoky Hill Trail that extended east from Kansas to Denver. Settlement occurred along these trails and farms and ranches, established along the South Platte River and its tributaries, lead to the later development of water irrigation systems. A number of railroads constructed through the region beginning in the 1860s eventually led to a decline in travel along these trails and opened up new markets within the state and beyond. As a result, the region experienced further settlement, population growth, and agricultural development between approximately 1870 and 1890. (Carter and Mehls 1984: 34-36, 41-43, 63-65)

The popularity of the automobile increased dramatically between 1900 and 1920 as a result of the Good Roads Movement and the establishment of the Colorado Highway Commission that expanded the state's highway network. The development of the first state highways included major routes providing connection between population centers and agricultural areas. In addition, smaller communities increasingly saw the benefits of highway access, which led to further highway construction along less traveled routes and alignments in the 1920s and 1930s, especially north-south routes to connect to more prominent east-west routes that linked to major population centers and markets. The major east-west transportation corridors across the eastern plains included US 40, I-70 and I-76, SH 34 and SH 36. (Carter and Mehls 1984: 118)

Prior to the current designation, SH 57 extended further to the north. A 1916 state highway map indicates that it extended north from Stratton through Kit Carson County, Yuma County, and a portion of Phillips County. The highway provided a connection between the east-west-aligned Ocean-to-Ocean Highway to the south and the Omaha-Lincoln-Denver Highway to the north, but SH 57 did not carry either of these named highways. By 1926, historic highway maps indicate that the route was designated a state highway and its route extended further to the north from Stratton to present-day US 36. A large portion of the original route is now designated SH 59 not SH 57.

Historically, SH 57 was one of several north-south highways on the eastern plains that provided local access to more prominent east-west routes; it was the east-west routes that provided the direct link to major commercial centers located to the west along the front range. Other north-south highways in the region included SH 61, 63, and 385. The current alignment of SH 57 is a short local connector road added in 1966 and is not located along or associated with the historic alignments of SH 57 described above. State highways, farm-to-market roads, and small local connector roads served to link more remote areas with major regional transportation corridors, towns, and cities; however, research and review of historic mapping does not indicate that this highway provided direct access to destinations related to important historic themes such as industry, agriculture, or commerce. SH 57 does not date to the historic period of early named highways and since the designation of the current alignment of the route in 1966 has served as a short, minor connector road between Stratton and I-70.

(Unless otherwise indicated, sources used in the preparation of this section included state highway maps, the Highways of Colorado by Matthew Salek, Highways to the Sky: A Context and History of Colorado's Highway System, Colorado State Roads and Highways, National Register of Historic Places Multiple Property Submission, plans in the Online Transportation Information System (OTIS), and site forms for previously surveyed resources in Compass when available.)

Colorado Historic Highway Inventory - Historical Summary and Evaluation of Significance

Highway Name: State Highway (SH) 57

Not Significant - No historical significance identified

Significant - Historical significance identified (see details below)

Property Type and Areas of Significance:

A detailed explanation why this highway possesses historical significance is provided in the Significance Statement below.

Cultural:

Criterion A specific requirements

- Early and/or prominent project of the Colorado Highway Department (Transportation)
- Association with a significant event (If applicable, the Area of Significance is indicated in the statement of significance below)
- Association with federal work relief programs (Politics/Government)

Criterion C specific requirements

- Representative example (Transportation)

Engineering:

Subtypes

- Farm-to-Market Road
- Limited Access, Multiple-Lane, Divided Highway/Freeway
- Highway Bypass

Criterion A specific requirements

- Early and/or prominent project of the Colorado Highway Department (Transportation)
- Association with a significant event (If applicable, the Area of Significance is indicated in the statement of significance below)
- Association with federal work relief programs (Politics/Government)

Criterion C specific requirements

- Representative example (Transportation)
- Engineering achievement (Engineering)

Aesthetic:

Criterion A specific requirements

- Early and/or prominent project of the Colorado Highway Department (Transportation)
- Association with a significant event (If applicable, the Area of Significance is indicated in the statement of significance below)
- Association with federal work relief programs (Politics/Government)

Criterion C specific requirements

- Representative example (Transportation)
- Engineering achievement (Engineering)
- Landscape architecture (Landscape Architecture)

Colorado Historic Highway Inventory - Historical Summary and Evaluation of Significance

Highway Name: State Highway (SH) 57

Historic periods of highway construction:

- Pre-territorial (pre-1861)
- Territorial and pre-automobile state roads (1861-1890)
- Automobile age (1890-1930)
- Depression and World War II (1930-1945)
- Postwar Interstate Era (1945-1973)
- Completion and Augmentation of Interstate System (1973-2000)

Level of Significance:

- Local
- State
- National

Significance Statement:

SH 57 is classified as an Engineered Route under the classification system in the MPS.

Criterion A

Research did not indicate that this highway is an example of an early or prominent project by the Colorado Highway Department (CHD) or was built or improved as part of a federal work relief project, or as a farm-to-market road providing access between an important agricultural region and its market. Present-day SH 57 is a later 1966 alignment and comprises a short spur off of I-70. The route provides routine access with its connection to US 24 in the community of Stratton and I-70. The highway does not possess significance under Criterion A.

Criterion B

Research did not reveal this highway to be directly associated with the events or work of a person important in history, nor does research indicate the highway represents the efforts of a specific individual to secure construction of this highway for the economic development of a community or area of the state. Therefore, this highway does not possess significance under Criterion B.

Criterion C

This highway is not considered to be an early or prominent project of the CHD. Research and literature review yielded no evidence to indicate the use of innovative or important engineering design or construction techniques that serve to distinguish this highway from other roads and does not appear to exhibit important engineering innovations or important later modifications. The highway's design and construction appear to fall within the established standard practices of state highway design and construction of the time and the highway does not possess significance under Criterion C.

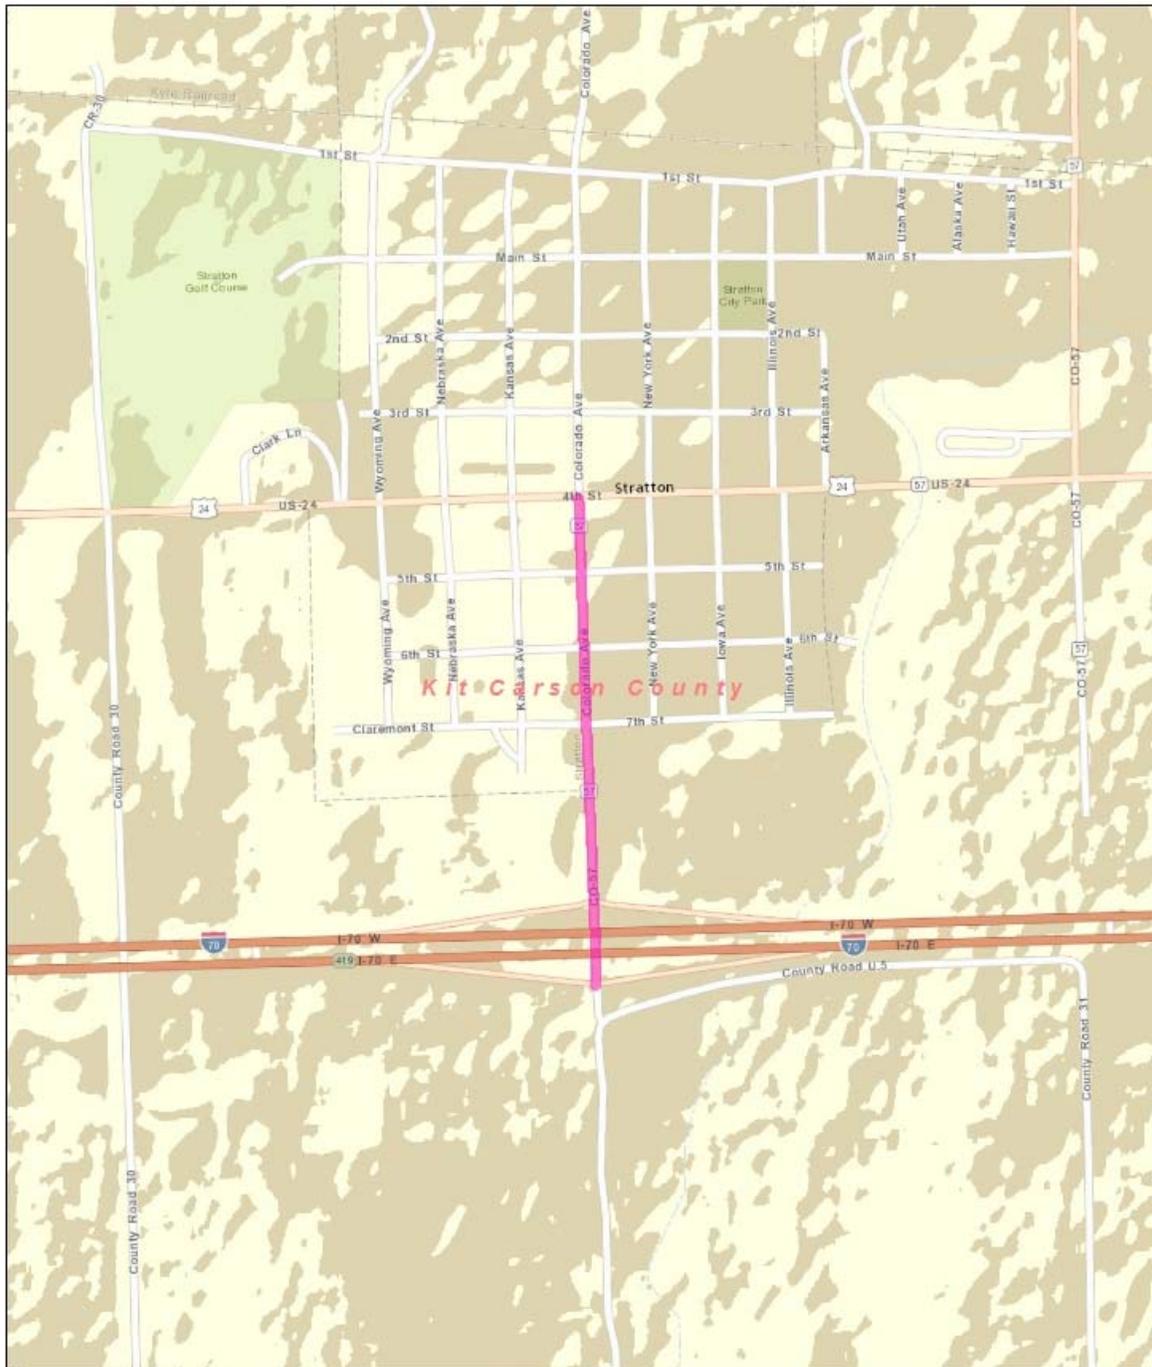

Criterion D

For a property to possess significance for information potential, the information yielded by the property must answer specific important research questions that cannot be otherwise answered. The technology of highway construction is well understood and documented. As such, this highway is unlikely to yield important information that cannot be discerned from archived plans and other records. Therefore, this highway does not possess significance under Criterion D.
