## Clean Air Act

Today's national air quality regulations are a result of various Congressional actions over the past half century, especially the Clean Air Act (CAA) Amendments of 1977 and 1990. CAA requirements are administered and enforced by the U.S. Environmental Protection Agency (EPA).

Various planning, monitoring and enforcement responsibilities are delegated by EPA to the States. In Colorado, delegated functions are handled by the Colorado Department of Public Health and Environment. The Colorado Air Quality Control Commission establishes state air quality regulations as needed. Colorado Department of Transportation roadway construction and maintenance activities are subject to CAA requirements.

Regulations: 42 USC 7401 et seq.
