Modified Environmental Site Assessment

A Modified Phase I Environmental Site Assessment (MESA) is a document that reports and summarizes available data regarding the potential presence of hazardous materials in a roadway project corridor. A MESA is prepared as a supporting technical report for an Environmental Impact Statement or an Environmental Assessment for roadway improvements proposed by the Colorado Department of Transportation.

A MESA is based on review of publicly available records and does not include property owner interviews or materials testing.

Regulations: 40 CFR 312

Guidance: American Society for Testing of Materials (ASTM) Standard Practice for Environmental Site Assessments
