Public Participation Tools

Public participation is critical to the successful outcome of CDOT transportation decisions, including decisions made pursuant to the National Environmental Policy Act. Developing an effective public involvement program is a strategic effort that requires assembling a selection of techniques to meet the needs of a given transportation plan, program, or project.

A useful resource on this topic is Public Involvement Techniques for Transportation Decision-making, a 2006 report prepared by the Federal Highway Administration. It is available online at:
<http://www.fhwa.dot.gov/reports/pittd/cover.htm>

Another useful source of methods for encouraging public participation is the website of the International Association for Public Participation (IAP2). It can be accessed online at: <http://www.iap2.org/>
