## CDOT Illicit Discharge Program

The purpose of the CDOT Illicit Discharge Program is to identify and eliminate any discharge to CDOT's storm drain system that does not consist entirely of stormwater, except for: (1) discharges specifically authorized by a Colorado Discharge Permit System, and (2) allowable non-stormwater discharges. Sources of illicit discharges include, but are not limited to, improper cross connections between sanitary or industrial sewers and storm sewers, or spills that flow into the storm drainage system.

The program consists of the following activities:

- Prevention of illicit discharges and improper disposal.
- Ongoing field screening.
- Investigation of suspected illicit discharges.
- Procedures to prevent, contain, and respond to spills.
