Illicit Discharge Hotline (303) 512-4426

The Colorado Department of Transportation has a permit from the Colorado Department of Public Health and Environment to discharge unpolluted stormwater from the State Highway System into streams and other bodies of water. Occasionally, pollutants get discharged into this system without CDOT's knowledge and certainly without its consent. This is considered an illicit discharge and is a violation of the federal Clean Water Act.

CDOT employees, contractors and any members of the public who discover an apparent illicit discharge are asked to immediately report the problem to the CDOT Illicit Discharge Hotline. Notifying CDOT promptly can help to minimize the ecological damage that results from the discharge.
