Clean Water Act Section 401 Certification

Highway improvements by the Colorado Department of Transportation can result in the discharge of stormwater to nearby waters. When the discharge affects the navigable waters of the United States, this triggers the need for compliance with Section 401 of the Clean Water Act.

Section 401 certifications are under the authority of the Water Quality Control Division (WQCD) of the Colorado Department of Public Health and Environment. WQCD reviews proposed projects, including their water quality Best Management Practices, to ensure that Clean Water Act requirements would be met.
