Waste Management BMPs

Waste Management BMPs

Highway construction and maintenance activities generate a large amount of waste material. Waste management Best Management Practices (BMPs) are intended to minimize or prevent contamination of the natural resources present from waste materials.

Highway construction and maintenance activities generate a large amount of waste material. Waste management Best Management Practices (BMPs) are intended to minimize or prevent contamination of the natural resources present from waste materials.

Waste management BMPs used by the Colorado Department of Transportation include the following types of measures:

- Concrete Waste Management
- Solid Waste Management
- Sanitary and Septic Waste Management
- Liquid Waste Management
- Hazardous Waste Management
- Contaminated Waste Management

Guidance: CDOT Erosion Control Stormwater Quality Guide, Chapter 5
