African Rue

(Peganum harmala)

The Colorado Noxious Weed Act requires every landowner to **eradicate this weed** wherever it is found on his or her property. The Colorado Department of Transportation controls these weeds on its right-of-way.

African rue is a bright green, succulent, shrubby, perennial herb. It grows 1 to 2 feet tall with a tap root and lateral root system that can extend 20 feet or more into the soil. The stems are multi-branched, stiff and hairless. The fleshy leaves are dissected three times or more into linear segments. The flowers are white with five petals. Seeds are produced in a three-chambered capsule, with many small seeds in each chamber.

This species is extremely poisonous to cattle, sheep, horses and humans. More details about this species and herbicides to control it are available online at <http://www.colorado.gov/ag/weeds>.
