Absinth Wormwood

Artemisia absinthium

The Colorado Noxious Weed Act requires every landowner to **eradicate, contain or suppress this weed** wherever it is found on his or her property. The Colorado Department of Transportation controls these weeds on its right-of-way.

This weed is a long-lived perennial that has a strong sage odor. It grows 2 to 4 feet tall. It has a taproot that can reach 2 inches in diameter. Its shallow lateral root branches that can extend up to 6 feet long in all directions. Plants are woody at the base and grow back from the soil level each spring. The numerous stems are covered with fine, gray hairs. The leaves are blue-olive green. The flowers are small and yellow.

Compared to most perennials, this weed is fairly easy to control with herbicides in combination with mechanical methods. More details about this species and herbicides to control it are available online at <http://www.colorado.gov/ag/weeds>.
