## Chinese Clematis

(Clematis orientalis)

The Colorado Noxious Weed Act requires every land-owner to **eradicate, contain or suppress this weed** wherever it is found on his or her property. The Colorado Department of Transportation controls these weeds on its right-of-way.

Chinese clematis is an herbaceous to woody vined perennial. It is a deciduous climber growing to 12 feet long. The flowers are solitary flowers with four yellow sepals (petal-like structures), often nodding. Each flower produces numerous feathery, long-tailed fruits which are conspicuous all winter.

This weed can be pulled or dug up when the soil is moist. Make certain to pull all the roots. If the plant is flowering, bag it carefully to avoid scattering any seeds. More details about this species and herbicides to control it are available online at <http://www.colorado.gov/ag/weeds>.
