Mayweed Chamomile

(Anthemis cotula)

The Colorado Noxious Weed Act requires every land-owner to **eradicate, contain or suppress this weed** wherever it is found on his or her property. The Colorado Department of Transportation controls these weeds on its right-of-way.

Mayweed (“stinking”) chamomile is a bushy annual that grows from 6 inches to 2 feet tall. The leaves are finely dissected, alternate, and approximately 0.75 to 2.5 inches long and 1 inch wide. The flowers are 0.75 to 1.25 inches in diameter with 12 white ray flowers and yellow disk centers. They are solitary and borne at the ends of branches. **The plant emits an unpleasant odor and is toxic to livestock and pets.**

Mowing is not effective for control of this species. Each plant can produce as many as 960,000 seeds. More details about this species and herbicides to control it are available online at <http://www.colorado.gov/ag/weeds>.
