## Sulfur Cinquefoil

(Potentilla recta)

The Colorado Noxious Weed Act requires every landowner to **eradicate, contain or suppress this weed** wherever it is found on his or her property. The Colorado Department of Transportation controls these weeds on its right-of-way.

Sulfur cinquefoil is a perennial forb that grows 12 to 28 inches tall. The flowers are pale yellow with 5 heart-shaped petals. Leaves are numerous and compound with 5 to 7 leaflets having toothed edges. Leafstalks have perpendicular hairs. The plant has a long life span. Thus, 20 year old plants are not uncommon.

Proper identification of this species is important, since it closely resembles other, native species of cinquefoils. More details about this species and controlling it are available online at <http://www.colorado.gov/ag/weeds>.
