

Downy Brome
Bromus tectorum

05-0305-11

general info

This image shows a card for Downy Brome (*Bromus tectorum*). It features a central photograph of the grass, a circular icon of the plant in the top left, and a 'general info' icon in the bottom right. At the bottom left, there are four small circular icons: a blue one, a pink one, a black and white one with a ship, and an orange one with a tractor. The card is framed with a yellow border and a green inner border.

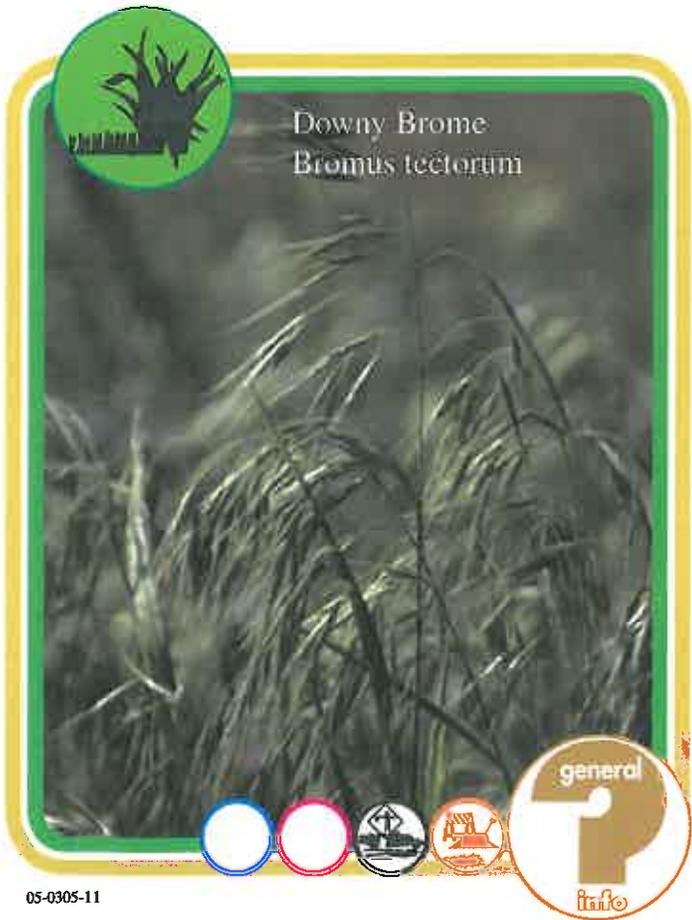

Downy Brome

(*Bromus tectorum*)

The Colorado Department of Agriculture (CDA) encourages, but does not require, landowners to stop the continued spread of this invasive plant. The Colorado Department of Transportation controls these weeds on its right-of-way.

Downy brome is an annual grass that grows 4 to 30 inches tall. Its leaves are light-green and hairy. The flowering part of the plant changes color from green to purple to brown as the plant matures. This plant is **also called cheatgrass** and a variety of other names. **Mature downy brome is highly flammable, greatly increasing fire hazard.**

Cutting is not recommended as a control measure. Several types of herbicides are known to be effective alone or in combination. Check with the CDA and local weed control authorities for herbicide recommendations
