Velvetleaf

(*Abutilon theophrasti*)

The Colorado Department of Agriculture (CDA) encourages, but does not require, landowners to stop the continued spread of this invasive plant. The Colorado Department of Transportation controls these weeds on its right-of-way.

Velvetleaf is a summer annual that grows 3 to 8 feet tall. The entire leaf plant is velvety and soft and is covered with short, fine hairs. The large leaves are heart-shaped and pointed at the tip. The 5-petal flowers are solitary or in small clusters. They are yellow to yellow-orange and 0.75 inch wide. The plant grows from a stout main stem.

Herbicides appropriate for this weed are available. Check with the CDA and local weed control authorities for herbicide recommendations.
