CDOT Wetlands Program

The Colorado Department of Transportation's Wetlands Program staff provides technical assistance for transportation project development and construction to ensure that CDOT actions result in no net loss of wetlands.

Colorado wetlands generally include wet meadows, marshes, fens and similar areas that support vegetation adapted for life in saturated soil conditions. Wetlands serve a number of important roles that are beneficial to the environment and people, and they are protected under the Clean Water Act.

Partner agency: U.S. Army Corps of Engineers

Federal Law: 40 CFR 100
Federal Regulations: 23 CFR 771, 23 CFR 777
Executive Order: 11990
US DOT Order: 5660.1A
