

Checklist for Wetland Findings

During the environmental clearance phase of project planning, it may become apparent that a proposed action will have unavoidable impacts to wetlands and require a Wetland Finding to comply with Presidential Executive Order 11990.

To assist practitioners in the preparation of a required wetland finding, CDOT has developed a tool called the Checklist for Wetland Findings and Wetland Finding Amendments. This 3-page checklist indicates the key elements and 7 attachments (if applicable) that may be needed for a Wetland Finding that will meet CDOT and FHWA requirements.

Practitioners can expedite completion of a wetland finding by reviewing this checklist before they begin their work and before they finalize the finding for submittal to CDOT.
