Biological Opinion

A Biological Opinion (BO) is a document prepared by the U.S. Fish and Wildlife Service (USFWS) for a Federally funded project (such as a transportation project) that would be undertaken in an area where there are species listed or proposed for listing as threatened or endangered. A BO is prepared based upon and in response to a biological assessment (BA) prepared by the agency sponsoring the project.

The BO summarizes the information provided by the BA, discusses the effects of the proposed action in detail. It also indicates the opinion of the USFWS as to whether or not the action is likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat.

Law: 16 USC 35

Regulations: 50 CFR 402.02 and 402.14(h)
