Shortgrass Prairie Initiative

In 2001, the Colorado Department of Transportation (CDOT) signed an agreement with the Federal Highway Administration, the U.S. Fish and Wildlife Service, the Colorado Division of Wildlife, and The Nature Conservancy to work with landowners and communities to preserve thousands of acres of shortgrass prairie, an imperiled ecosystem.

The initiative will also improve the efficiency and effectiveness of the environmental measures associated with CDOT's routine maintenance activities, and will support bridge replacement and other activities on existing highways in Colorado's shortgrass prairie over the next 20 years.
