

**THREATENED, ENDANGERED, CANDIDATE,
AND PROPOSED SPECIES BY COUNTY
June 2018**

Symbols:

- * Water depletions in the Upper Colorado River and San Juan River Basins, may affect the species and/or critical habitat in downstream reaches in other states.
- ▲ Water depletions in the North Platte, South Platte and Laramie River Basins may affect the species and/or critical habitat associated with the Platte River in Nebraska.
- © There is designated critical habitat for the species within the county.
- # Recent genetic tests identified cutthroat population as GB lineage, therefore, consultation is an interim measure until genetic and taxonomic issues are resolved.
- § This applies only to white-tailed or Gunnison's prairie dog habitats. All black-tailed prairie dog habitats within Colorado have been block-cleared from the requirements of ferret surveys.
- T Threatened
- E Endangered
- P Proposed
- X Experimental
- C Candidate
