

## I-25 NORTH

120TH AVENUE TO NORTHWEST PARKWAY/E-470 COMING SOON

## WHY EXPRESS LANES? THE ANSWER IS SIMPLE: CHOICE.

Express Lanes increase road capacity and help manage congestion on the highways, eliminating the need to continue to build more lanes. And the best part? The choice is yours. Ride the bus, carpool, pay a toll or just use the existing free general purpose lanes. Express Lanes work to move more people, rather than move more cars. By offering choices, Express Lanes will help to reduce delays, manage congestion and keep travel times reliable for motorists.

## **NEW EXPRESS LANES COMING SOON**

As Colorado's population continues to grow, Express Lanes are a long-term solution to make sure drivers will be able to get where they are going and get there on time. A system of Express Lanes is under construction: Central 70 Project, C-470 Express Lanes Project, I-25 North Express Lanes Project: from Berthoud to Fort Collins, I-25 North Express Lanes Project: from 120th Avenue to Northwest Parkway/E-470, the I-25 South Gap Project: from Monument to Castle Rock, and soon on the westbound I-70 Mountain Express Lane.

## I-25 NORTH 120TH AVENUE TO NORTHWEST PARKWAY/E-470

I-25 North between 120th Avenue and Northwest Parkway/E-470 is one of the most congested stretches of the highway. This I-25 North Express Lanes Project will:

- Add capacity and provide the choice of a reliable trip with the addition of one Express Lane in each direction
- Install an auxiliary lane along northbound I-25 to connect the 136th Avenue on-ramp to the 144th Avenue off-ramp, which will help drivers merge more comfortably between the two interchanges
- Improve driving conditions by resurfacing the roadway
- Address necessary drainage and utility improvements along the corridor
