ITS Architecture Plan

Service Package - Focuses on the application use of a technology

Service Package Description

Stakeholders & End Users

Elements - The different components of the system that are required for the system to function as intended. Example of an element: ATMS, Traffic Operations Center, ITS device, drivers, etc.

Required - Defines R&R of stakeholders and end users who must always be involved.

Recommended - Suggested list that is region based.

Interfaces - Defines how the elements will communicate with each other.

Functional Objects - The different portions of the element that are broken out to be service package specific.

Functional Requirements - The requirements for the functional object.
