

CDOT is proud to unveil its brand new logo for the Statewide Transportation Plan. Coloradans know that Transportation Matters – without it we can't access the communities, jobs, and natural areas that make life in this state so wonderful. It's important to have a multimodal, efficient, and affordable transportation system that works for everyone, and the Statewide Transportation Plan logo reflects this fact. Let's look at some of the pieces:

Trains, Planes, & Automobiles – A successful transportation system is one that matches specific needs to different travel modes and allows for easy movement between them. The Statewide Transportation Plan will incorporate highways, transit, rail, aviation, cycling, and walking to expand travel choices and increase the efficiency of the entire system.

From the Mountains to the Plains – Colorado is a state defined by stunning landscapes, and we want to travel to all of them. The Statewide Transportation Plan will strengthen connections between and throughout every part of the state, bringing people closer together and making a thriving economy possible.

For Coloradans, By Coloradans – Our state is like no other, so we need a Statewide Transportation Plan as unique as Colorado itself. CDOT is collaborating with communities throughout the state, listening to local priorities, and working to fulfill their transportation needs. Providing a transportation system is a big job – that's why we need everyone's input and support.

Transportation Matters – Each of us relies on transportation to live our lives and do the things that we love. The Statewide Transportation Plan will help to shape Colorado's transportation system for decades to come, and the choices that we make now will have the power to change our state for the better. It's too important to ignore – let's start building our transportation future together!

The mission of the Colorado Department of Transportation is to provide the best multimodal transportation system for Colorado that most effectively moves people, goods, and information.
