Dear Transportation Partners:

When you think about all of the wonderful attributes of Colorado, you often think of 300 days of sunshine, our access to an abundance of outdoor activities including numerous ski resorts and you may even think of the easy access to health care, businesses, jobs and much more. But what is often forgotten is transportation, the thread that connects everything we love about Colorado.

To educate Coloradans on the importance of transportation and the role the Colorado Department of Transportation (CDOT) plays in building and maintaining our transportation system, we have developed a short video called "Transportation Matters." The four-minute video touches on CDOT's roles and responsibilities, how transportation is funded and how the money is spent in order to maintain our existing infrastructure.

The video is available to view and share on our YouTube account- <http://www.youtube.com/watch?v=PHbzciHViwU>. The video is available to view and download at <http://www.coloradodot.info/news/media-room.html>. If you would like a DVD, please contact Tina Talbot at tina.talbot@state.co.us or 303-757-9228.

We hope you will find the video worthwhile and we appreciate your help and support to educate motorists on why transportation matters and the transportation challenges facing our state.

Sincerely,

Don Hunt
CDOT Executive Director
