Economic and Population Forecasts

County level revised annually

- **Population change tied to both economic and demographic change.**
 - Demographic cohort-survival model = supply of labor provided by existing populations.
 - Economic forecast = demand for labor.
 - Economic Drivers
 - National Forecast
 - Local information – openings/closures
 - Differences in labor supply vs. labor demand resolved by the net migration of populations and associated household members

	Population	254,230	445,160	567,218

Why Are We Getting Old Fast?

- Currently very few people over the age 65.
 - 4th lowest share of all states in US (10%)
- Baby Boomers
 - Born 1946 – 1964
 - 1,340,000 Boomers in Colorado (26% of pop. in 2010)
- By 2030, Colorado's population 65+ will be 125% larger than it was in 2010 growing from 555,000 to 1,243,000. (just from aging)
- Transition age distribution from “young” to more US average between 2010 and 2030.

Aging Issues

- Numbers
 - Colorado has never had many older people
- Economic Driver - wealthier depends
 - Spending of people 65+ supported approximately 137,000 jobs in 2010. (.25 jobs per person 65+)
- Labor Force
 - 37% of Labor Force – succession planning, gov't is one of the oldest average age sectors.
 - Worker to non worker share changing – non commute traffic
- Housing
 - Location choice related to amenities, health services, transportation services, costs.

Disabilities 65+

- Currently 34% have a disability
- Probabilities:
 - **69%** 65+ will have a disability at some point
 - **35%** 65+ will enter a nursing home
 - **50%** 85+ will need assistance with everyday tasks
- Increase in demand for transportation services for those with disabilities.

Aging and Public Finance

- Ratio of 65+ per 20-64 year olds in CO
 - Becoming more “normal”
- End of the “demographic dividend”
- Public Finance – change in revenue and expenditures.
- Income tax – downward pressure
- Sales tax – downward pressure
- Property tax – downward pressure
- Health services – increasing
- Medicaid - increasing

Household Income....its falling.

- Colorado Real Median HH Income fell between 2000-2010 by \$7,700 (12%). US median HH Income fell by \$4,900 (8%)
- Age distributions – “End of “Demographic Dividend”
- Occupational Mix – high and low service
- Race/ethnicity of householder + Educational attainment.
- Household type and size – single and smaller.
- Youth un and under employment - Long term permanent impacts on earnings.

Share of Unemployed by Age

Source: Bureau of Labor Statistics 2011 Annual Average

Summary

- Population growth (rate) slowing but faster than US.
- Job change drives population change.
- Household formation changes – single person
- More diverse racially/ethnically – especially at young end.
- Aging - Fundamental change to our state due to current low share over 65.
 - Primary impact Front Range and Western Slope
- Income – downward pressure on per household income.
 - Age
 - Educational attainment – potential
 - Long run un and under employment
