

STIP Reports

Statewide Transportation Improvement Program

OVERVIEW OF THE STIP REPORTS

The STIP may also be accessed [online](#). An updated web-based version of the STIP was launched in November, 2025. This new software, called Project Tracker, allows for additional interactivity including project mapping and an enhanced capability to search the STIP. It should be noted that this new eSTIP is the official STIP of record. All project information is updated in the software and supersedes any static reports provided to the public and CDOT's planning partners. The new eSTIP may be accessed [here](#).

As mentioned in the Executive Summary in Chapter 1, there are two types of projects included in the STIP – regionally significant projects and STIP Pool projects. Regionally significant projects meet specific federal criteria as projects serving regional transportation needs. Amendments and modifications to STIP projects are explained in the [STIP Amendment Guidance](#). STIP Pool projects are projects that do not meet criteria for identification as regionally significant, and are grouped together based on the primary source of funding for that project, such as Surface Treatment funds.

STIP projects are identified using the following naming convention: SXXxxxx.xxx. The “S” stands for STIP, the XX represents a Transportation Planning Region (TPR) or CDOT Region designation, followed by a four digit project number and a three digit extension.

The STIP project list is organized by CDOT Region. CDOT has five engineering regions and a statewide region that represents programs managed at the statewide level at the CDOT Headquarters office. Statewide projects and programs are given the Region designation of ST. Fields in the STIP include the following:

- CDOT Region – 01 through 05, plus ST.
- STIP ID – The unique identifier for STIP projects.
- Title – The project name of the project.
- Description – The name of a regionally significant project corridor or the name of the STIP Pool the STIP ID belongs to. I-25 North and Floyd Hill are examples of regionally significant corridors. STIP Pools are typically identified as a CDOT Region's Surface Treatment Pool, FASTER Safety, etc.
- Lead Agency – The agency that will oversee the management of the project.
- Fiscal Years – Identifies the funding by State Fiscal Year.
- Fund Program – Represents the CDOT funding program(s) identified for budgeting a STIP project. Specific funding programs can be found in Chapter 8 – Acronym List.
- Fund Type – Identifies the specific federal and state programs the funding is tied to. For example, federal programs will show in this column as NHPP (FHWA's National Highway Priority Program), 5307 (FTA's USC Section 5307 Program), while state programs may show as a legislated program, such as SB260, or as SHF (Colorado's Highway User Tax Fund, or gasoline tax). All of these fund types are detailed in the Acronym List in Chapter 8.

- Total Project Funding – Shows the total funding for the project.
- Fund Source – Identifies whether the funding is Federal, State, or Local. Funding is subdivided here to show the splits between the funding sources.
- STIP Phase – Represents the phase for the projects, such as Construction (C), Design (D), Right of Way (R), Environmental (E), Utilities (U), or Miscellaneous (M). Funding is subdivided here to show the amount of funding assigned to specific phases.

STIP Reports

Additionally, two separate STIP reports are provided. The first report – the STIP Summary Report – All Projects - provides a detailed view of each project included in the STIP at the time the data was downloaded

The Major Projects report shows data that is extracted from the full STIP report and reflects those projects that are considered to be regionally significant.

These reports should not be utilized for determining fiscal constraint. For fiscal constraint, please refer to the report provided in Chapter 5.

NOTE Regarding Enterprise Projects listed in the STIP

Bridge and Tunnel Enterprise Fund 400 Projects:

All projects that are funded by the Bridge and Tunnel Enterprise (BTE) will be added to the STIP and updated as needed by BTE staff. Regions don't need to STIP these funds since they belong to and are managed by the Enterprise. BTE projects can be found in the STIP by filtering for a Bridge and Tunnel funding program. The most used Bridge and Tunnel funding programs are SSR and BTE. SSR is used specifically for the Enterprise's FASTER Bridge Safety Surcharge funds and BTE for the Enterprise's funds associated with SB21-260.

The passage of SB21-260 expanded the scope of the Enterprise to include tunnel projects. HB23-1276 further expanded the scope of the Enterprise to allow for bridge bundling and bridge preventative maintenance projects on structures that are in good and fair condition. The passage of these two bills has allowed BTE to fund projects where the asset belongs to CDOT and not BTE. For example, BTE funded projects for the Eisenhower Johnson Memorial Tunnel (EJMT) in R1 and the tunnel is an asset that belongs to CDOT. This means the project will show up in the STIP as local dollars utilizing the LOM (Local) funding program.

STIP Summary Report

All Projects
