Vision
To enhance the quality of life and the environment of the citizens of Colorado by creating an integrated transportation system that focuses on moving people and goods by offering convenient linkages among modal choices.

Mission
To provide the best multi-modal transportation system for Colorado that most effectively moves people, goods, and information.

Values
People- We value our employees! We acknowledge and recognize the skills and abilities of our coworkers, place a high priority on employee safety, and draw strength from our diversity and commitment to equal opportunity.
Respect- We respect each other! We are kind and civil with everyone, and we act with courage and humility.
Integrity- We earn Colorado’s trust! We are honest and responsible in all that we do and hold ourselves to the highest moral and ethical standards.
Customer Service- We satisfy our customers! With a can-do attitude we work together and with others to respond effectively to our customer’s needs.
Excellence- We are committed to quality! We are leaders and problem solvers, continuously improving our products and services in support of our commitment to provide the best transportation systems for Colorado.
Late 1800s The majority of Colorado’s roads were privately built by stage or mining companies or built as toll roads by individuals.

1909 A three-member Highway Commission was formed to approve highway work and allocate funds.

1913 The state Legislature created the Internal Improvement Fund solely for highway purposes. Revenue from highway user fees was allocated to the state and counties at a 50/50 ratio.

1916 The Federal Road Act was passed and funds were allocated to the states based on specific criteria.

1917 The State Highway Fund was created and a department was formed to approve highway construction projects. The department consisted of a five-member Highway Commission, executive director, and staff.

1921 The State Highway Department was created, as well as a seven-member advisory Commission.

1952 A new eight-member, policy-making Highway Commission was established.

1971 An amendment to the Colorado Constitution permitted the Governor to appoint all Highway Department directors.

1983 The Colorado State Patrol was removed from the Highway Department and placed within the newly created Department of Public Safety.

1987 The General Assembly increased the number of highway commissioners to 11.

1991 The Department of Highways became the Colorado Department of Transportation (CDOT).

2002 The Colorado General Assembly passed legislation creating the Colorado Tolling Enterprise (CTE), a division within CDOT.
The state’s transportation system is managed by CDOT under the direction of the state Transportation Commission. The Commission, non-partisan and statutorily authorized, is comprised of 11 commissioners who represent specific districts (listed on page 8). Each commissioner is appointed by the Governor, confirmed by the Senate and serves a four-year term.

Colorado Tolling Enterprise

In 2002, the Colorado General Assembly passed legislation creating the Colorado Tolling Enterprise (CTE), a government-owned, nonprofit business operating within, and as a division of CDOT. The Transportation Commission serves as the Tolling Enterprise Board. The purpose of the CTE is to finance, construct, operate, regulate and maintain a system of toll highways in Colorado.

The CTE has the authority to conduct all aspects of building and operating toll highways, including setting and adjusting tolls, issuing revenue bonds, overseeing maintenance and entering into public/private partnerships. The enterprise may only toll new or additional highway capacity.

In June 2006, the CTE opened its first toll facility, which is located on I-25 between Downtown Denver and US 36. The HOV/tolled Express Lane facility is free to carpoolers with variable tolling prices for solo drivers (more information on page 40)

Colorado Aeronautical Board

The seven-member Colorado Aeronautical Board was created by statute in 1988 and works closely with the 77 public-use airports in Colorado to maintain, develop, and improve the state’s aviation system.

CDOT’s Aeronautics Division, created in 1991, supports Colorado’s general aviation community through fuel tax entitlement refunds, a discretionary aviation grant program, and long-range system planning in partnership with Colorado’s general aviation airports. The Colorado Aeronautical Board provides direction and oversight to CDOT Aeronautics.

Aeronautical Board Members

**Harold Patton**, Chairman- Eastern Plains Governments

**Harold Felderman**, Vice Chair- Eastern Plains Governments

**Patrick Wiesner**, Secretary- Pilot Organizations

**Leo Large**- Western Slope Governments

**Dale Hancock**- Western Slope Governments

**Larry Romrell**- Aviation Interest-at-Large

**Dennis Heap**- Airport Management

**Director**- Travis Vallin

Every CDOT project is identified in the Statewide Transportation Improvement Program (STIP) based on its ability to solve or improve a particular mobility, safety or system quality-related problem. Projects must be consistent with the Corridor Visions, Goals and Strategies set forth in the long-range Statewide and Regional Transportation Plans.

Long-Range Planning Process – Statewide and Regional Transportation Plans – 20+ year plans

1. Determine appropriate Transportation Planning Region (TPR) and Regional Planning Commission (RPC) representative (see page 15.)

2. Participate in the corridor vision development process held by the RPC and CDOT to determine the overall vision, goals, and strategies for all regional transportation corridors for the purpose of addressing the transportation needs for each planning region.

3. Regional Transportation Plans are adopted by respective RPC and integrated into the Statewide Transportation Plan which is adopted by the Transportation Commission. Public involvement is encouraged at the regional and statewide level.

Deciding Which Projects Get Built – 6 Year Statewide Transportation Improvement Program (STIP)

4. The STIP process determines how available funds will be programmed over the next 6 years. In the process, regional representatives from CDOT conduct the county hearing process to discuss recent accomplishments and identify local and regional funding priorities for the next few years. Using this input and Transportation Commission guidance, CDOT regions select projects for inclusion in the draft STIP.

5. At joint meetings with all TPRs, projects submitted through the county hearing process are prioritized. Projects that are selected must be in the regional transportation plan and CDOT’s regional constrained budget. CDOT prepares the draft STIP that identifies how they propose to expend funds.

6. Draft STIP is reviewed to ensure compliance with state and federal regulations; made available for public comment, and approved by the Colorado Transportation Commission, the Federal Highway Administration and the Federal Transit Administration.

7. STIP projects are programmed, budgeted and designed.

8. STIP projects are advertised, a contractor is selected and work begins.
Transportation Planning regions are shaded and labeled accordingly. The numbers represent CDOT’s management regions.

CDOT Revenue ( Millions )
VS Full-Time Equivalent ( FTE ) Count

Dollars Spent on Consultant Contracts (in millions)

Source: Division of Financial Management and Budget (303) 757-9262
In 1996, the Transportation Commission adopted this program identifying 28 high-priority projects for accelerated construction, establishing a minimum annual level of funding. In 1999, Colorado voters passed Referendum A, allowing CDOT to issue Transportation Revenue Anticipation Notes (TRANs bonds) to speed up the completion of the Strategic Transportation Projects. This program is funded by several sources of revenue in addition to bonds.

**Already Completed or Fully Funded**

- I-25/US 50/SH 47 Interchange

Colorado’s Interstate System

- Colorado’s interstate system has 956 designated miles.
- Nearly 50% of the current interstate system was built before 1965.
- Nearly 75% of the current interstate system was built before 1970. With a 20-year design life, much of it now requires extensive repairs.

</tr>
<tr>
<td>Vehicle-miles traveled</td>
<td>28.5 billion</td>
</tr>
</tbody>
</table>

Center-line miles measure roadway miles without accounting for the number of lanes. Lane-miles, which measure the total distance of all roadway lanes, are a better indicator of CDOT’s actual maintenance requirements. Vehicle miles traveled on all Colorado roads were 47.9 billion; VMT on state highways accounts for 60% of this total. The interstate system accounts for 10% of the total state system mileage, yet 40% of all VMT takes place on the interstate system.

*Difference over the last year.

Congestion Statistics

In 2005, 29% of Colorado’s urban highways were congested.

The average daily one-way commute increased from 20.7 minutes in 1990 to 24.3 minutes in 2000. As a result, the average commuter in Colorado now spends an additional 30 hours a year in traffic.

In Denver, the average daily one-way commute increased from 22.2 minutes in 1990 to 25.9 minutes in 2000. As a result, the average Denver commuter now spends an additional 31 hours a year in traffic. According to DRCOG, the average daily one-way commute in 2005 for the entire Denver metro area was 25.0 minutes.

From 1990 to 2005, vehicle miles of travel on Colorado’s interstates increased by 68% while the number of lane miles of interstates increased by 1%.

Vehicle travel on Colorado State Highways increased by 61% between 1990 and 2005, from 18 billion vehicle miles of travel (VMT) to 29 billion VMT. Vehicle travel on Colorado State Highways is projected to increase by another 36% by 2020, to 39 billion vehicle miles of travel.

Traffic congestion in Colorado costs licensed drivers $1.24 billion a year in delays and wasted fuel. In the Denver metro area, the annual average cost is $865, in Colorado Springs it is $451 and in all other areas it is $125. These figures are from Texas Transportation Institute’s Annual Urban Mobility Report.

Source: Division of Transportation Development (303) 757-9525
The maintenance program is split into two major categories. Regular maintenance covers items such as blading, revegetation, rockfall mitigation and much more. Snow and ice control involves plowing, sanding, and avalanche control.

*During the 2006 fiscal year, members of the Maintenance Program staff tended more than 26,000 lane miles by:*

- Repairing and maintaining more than 15.8 million square yards of roadway surface
- Utilizing 290,510 tons of asphalt and 2.19 million gallons of liquid asphalt in asphalt preservation activities
- Striping more than 32,466 miles of roadway and creating 2.24 million square feet of pavement markings using 1.98 million pounds of glass beads, 293,928 gallons of paint and 104,710 pounds of thermoplastics
- Snowplowing, sanding, and/or deicing 5.31 million miles of highway
- Applying 212,071 tons of salt/sand and 7.603 million gallons of liquid deicer to the highways
- Repairing and installing 421,660 feet of snow fence
- Disposing of 267,543 cubic yards of trash off the right-of-way with help of 20,000 Adopt-A-Highway volunteers and another 8,208 bags of trash with the support 18 corporate sponsors
- Replacing and repairing 107,431 signs and sign posts
- Replacing, installing, and repairing over 19.015 million linear feet of fencing along CDOT right-of-way
- Providing more than 53,484 hours of traffic surveillance along the I-70 corridor, which provided quick response to the 457 emergencies that occurred

Source: CDOT Staff Maintenance (303) 512-5502
Avalanche Management Program

CDOT’s Maintenance Program has developed and implemented an avalanche management program to maintain a level of safety for the traveling public and maintenance personnel.

Facts:

- CDOT’s Avalanche Atlas has over 522 known avalanche paths
- CDOT regularly monitors and/or controls over 278 avalanche paths
- For avalanche season 2005-2006
  - CDOT triggered more than 700 avalanches with explosives, of which, 351 impacted Colorado highways
  - CDOT experienced 955 hours of road closures, at various locations statewide, due to avalanche control
  - CDOT spent 6,281 hours performing avalanche mitigation activities and cleanup

Alcohol/Seat Belts/Young Drivers

CDOT administers the state’s federally-funded traffic safety program. The goal of the program is to reduce traffic deaths on Colorado’s highways. Primary focuses of the program include reducing alcohol-related traffic deaths, increasing adult seat belt use and car seat and seat belt use for children, and reducing teen driving deaths.

In 2005, (the most recent statistics available), traffic deaths decreased by 9.1% to 606 compared to 667 in 2004.

In 2005, alcohol was involved in 211 (34.8%) of Colorado’s 606 fatalities. On July 1, 2004, a .08 blood alcohol content (BAC) law took effect, lowering a Driving Under the Influence (DUI) charge from .10 BAC to .08 BAC. Colorado also retains a Driving With Ability Impaired (DWAI) offense at .05 BAC.

In 2005, drivers and passengers accounted for 549 of the traffic-related deaths; 339 (61.7%) of these victims were not buckled up. If everyone had buckled up, about half of those victims should have survived. The deaths include 27 children from birth through age 15 and 14 (51.9%) of the young victims were riding unrestrained.

During 2006, overall seat belt use in Colorado increased to 80.3% from 79.2% in 2005. For children under age five, car seat use decreased from 87.5% in 2005 to 85.5% in 2006. Seat belt use for children ages five through 15 moved up slightly from 69.5% in 2005 to 69.7% in 2006.

In 2005, 85 young drivers and passengers, ages 16 to 20, died on Colorado highways and nearly two-thirds of the victims were not using seat belts. In 2005, in Colorado, nearly 56 percent of the teen fatalities occurred with teen drivers at the wheel. The 2005 seat belt usage rate for ages 16 to 20 was 70.4%, which is about 10% lower than the overall usage rate for Colorado.

In 2005, new passenger restrictions were added to Colorado’s Graduated Driver Licensing (GDL) law in an effort to reduce teen traffic deaths and give young drivers a safer environment while they are learning to drive.

Safety Program

Economic Impacts

Traffic safety is a top priority for CDOT and its many partners in law enforcement, health care and community organizations across Colorado. Traffic deaths and injuries cost our nation and state in huge economic losses as well as in the pain and suffering of victims. According to the latest study of the economic impact of traffic crashes, Americans pay $230.6 billion each year, or $820 per person, to cover the cost of injuries and deaths on our highways. Based on statistics in 2000, the report puts the cost of a traffic fatality at $977,000 and the costs for a critically injured crash survivor at $1.1 million.

Who pays the bills for traffic crashes? Crash victims pay for about 26% of the cost. Through insurance premiums, taxes and travel delays, the public pays for nearly 75% of the cost. In 2000, that amounted to $170 billion. Traffic crash costs include lost workplace and household productivity, property damage, medical care and travel delays.

By continuing to increase seat belt use and reduce impaired driving on our highways, Colorado can save lives, prevent the pain and suffering of victims and protect critical financial resources.

Scenic and Historic Byways

Scenic and Historic Byways are nominated by local partnership groups and designated by the Colorado Scenic and Historic Byways Commission for their exceptional scenic, historic, cultural, recreational, and natural features. Currently, Colorado has 25 Scenic and Historic Byways. Ten of the byways are also designated nationally by the Secretary of Transportation (six are National Scenic Byways and two are All-American Roads.) For more information on this program visit http://www.coloradobyways.org>Main.cfm.

Adopt-A-Highway

This program brings together individuals, families, and groups such as service clubs, churches, scout groups, and employee associations, in order to clean up litter along our highways. To support the program, CDOT provides litter bags, safety vests, and an informational video, and will haul the litter bags away. To get involved, contact 303-757-9536 or visit http://www.dot.state.co.us/AdoptAHighway/.

Sponsor-A-Highway

In 2004, the Adopt-A-Highway program was expanded to include corporate sponsorships for litter removal on Front Range highways. The program includes approximately 383 miles of highway and allows the program contractor to erect signs recognizing a corporation’s financial contribution for litter removal. In exchange, the contractor will provide removal services on that sponsored segment of highway, typically once or twice a month. Corporations interested in becoming a sponsor should contact Karrie Jones at 800-350-7168 or visit http://www.dot.state.co.us/AdoptAHighway/Sponsor.cfm.
CDOT provides 24-hour “real-time” traveler information including road and weather conditions, chain laws, highway closures, and construction/maintenance schedules and accident detours. Last year, the road condition web site received over 210 million hits and over 1.4 million people called the road condition hotline.

Chain Regulations

Colorado chain laws apply to every state highway, federal highway and interstate throughout the state. However, Colorado law does not require that chains be carried in/on a vehicle at all times, but they must be used when required.

A vehicle is considered commercial if it is used in commerce to transport passengers or property if the motor vehicle:
- Has a gross combination weight rating of 26,001 lbs. or more, inclusive of a towed unit with a gross vehicle rating of more than 10,000 lbs.; or
- Has a gross vehicle weight rating of 26,001 or more pounds; or
- Is designed to transport 16 or more passengers, including the driver.

Levels of Chain Law:

Level 1 All single-axle combination commercial vehicles must chain-up

Level 2 All commercial vehicles are required to chain-up

I-70 Chain-up Stations (MM=mile marker)

Eastbound I-70:
- MM 180 (East Vail)
- MM 182.6 (East Vail)
- MM 183.8 (shoulder only, East Vail)
- MM 186.2 (East Vail)
- MM 203 (Frisco scenic overlook)
- MM 210.8 (three miles below Eisenhower Tunnel)

Westbound I-70:
- MM 228 (Georgetown)
- MM 221 (Bakerville)
- MM 218.5 (Herman Gulch interchange)
- MM 195 (Copper Mountain Overlook)
General Size and Weight
Information Based on State Statute

Legal Width: 8’ 6”

Legal Height: 13’; vehicles with a height of 14’ 6” shall be operated only on highways designated by CDOT

Legal Length:
- 45’ maximum – single unit – measured from extreme front bumper to extreme rear bumper
- 70’ maximum – tractor/trailer(s) combination, not to exceed four total units
- No overall length limit for a tractor/trailer combination with a single trailer length of 57’ 4” or less
- No overall length limit for a combination of units with two trailers 28’ 6” or less in length (“Western Doubles”)
- 75’ maximum (Saddlemounts) not exceed four total units
- 97’ maximum (Saddlemounts with Fullmount combination) not exceed three pulled units
- 75’ maximum Specialized equipment used in combination for transporting automobiles or boats

Legal Axle Weights:
- Single axle – 20,000 lbs.
- Tandem axles – 36,000 lbs.; 40,000 lbs. non-interstate
- Tridem axles – 54,000 lbs.

Legal Weight Limits (Total weight must be distributed so that no axle grouping exceeds the maximum gross weight per legal axle weight limits):
- Two axle/Single unit – 36,000 lbs.
- Three or more axles/Single unit – 54,000 lbs.
- Three or more axles/Combination units – 80,000 lbs.
Interstate highways; 85,000 lbs. Colorado non-interstate highways
I-25 HOV/Tolled *Express Lanes*

**I-25- Downtown Denver to US 36**
*Carpoolers and Motorcyclists:* Access to the HOV lanes remains free. Remain in the HOV lane when passing through the clearly marked toll collection zone, the only section in the facility where you must drive in the designated lane.

*Solo Drivers:* **Must have a transponder** and will be charged designated toll rate. Remain in the Toll/Express Lane when passing through the clearly marked toll collection zone, the only section of in the facility where you must drive in the designated lane. Tickets will be issued for driving in the wrong lane and evading the toll.

**Operation Schedule:**
**Morning: Between 5 a.m. and 10 a.m.**
*Enter:* I-25 at 84th Avenue; 70th Avenue T-Ramp; US 36 at Pecos
*Exit:* 19th Street at Wynkoop Street; I-25 south of the 20th Street Bridge

**Afternoon: Between noon and 3 a.m.**
*Enter:* I-25 south of the 20th Street Bridge; 20th Street by Coors Field
*Exit:* I-25 north of US 36; 70th Avenue T-Ramp; US 36 at Pecos

To obtain a transponder:
- Go to www.expresstoll.com
- Call EXpressToll® Customer Service locally at (303) 537-3470 or 1-888-946-3470
- Visit a retail establishment where you can sign up directly.

For more information visit www.dot.state.co.us/cte/ExpressLanes/ or www.expresstoll.com
**HOV Lanes**

**US 36/Boulder Turnpike**
HOV lanes on US 36 are restricted to carpools, buses and motorcycles at all times every day throughout the year.

The HOV lanes begin at I-25 or Pecos St. and continue until Federal Blvd. for northbound traffic. For southbound traffic, the HOV lanes begin at Sheridan Blvd. and end at Pecos St.

**US 85/Santa Fe Drive**
Buses, carpools, motorcycles and all vehicles making left turns are permitted during restricted hours.

The HOV lanes begin at Bowles Ave. and end at Alameda Ave. for northbound traffic. For southbound traffic, the HOV lanes begin at Platte River Dr. and end at Bowles Ave.

Hours of operation: 6 a.m. to 9 a.m. for northbound traffic and 4 p.m. to 6:30 p.m. for southbound traffic.

**State Highway 82**
HOV lanes on SH 82 are restricted to carpools, buses and motorcycles at all times every day throughout the year.

The HOV lanes extend from Basalt (milepost 23.9 to the Buttermilk Ski Area/Owl Creek Road (milepost 38.8).

Hours of operation: Monday through Friday, 6 a.m. to 9 a.m. for eastbound traffic and 3 p.m. to 6 p.m. for westbound traffic.

**Alternate Fuel Vehicle HOV Permits**

Vehicles using the following dedicated alternate fuels may use HOV lanes, with an approved CDOT decal, regardless of the number of occupants: **natural gas, propane, electricity, liquefied petroleum gas (LPG), and compressed natural gas.** The required decal for HOV lane usage may be obtained from CDOT by calling 303-757-9539. This does not include hybrid vehicles.

A fuel decal is also required from the Colorado Department of Revenue.

*Visitor information available*
Types of Airports

**Commercial Service Airports** provide scheduled air carrier and/or commuter service to surrounding communities. Commercial passengers are offered a multitude of terminal services including concessions, ground transportation options and parking. Many commercial service airports also provide an array of general aviation services and facilities for both the recreational and corporate traveler. Available services include refueling, instrument approaches, full-service fix based operators, corporate hangers and general aviation terminal facilities. Colorado has 15 commercial service airports.

**General Aviation Airports** provide a full range of aviation facilities and services to business and recreational users. Full-service fixed base operations, instrument approaches, refueling, corporate hangers and general aviation terminals are the services provided. Some general aviation airports known as reliever airports even reduce congestion at large commercial service airports in certain metro areas by providing general aviation pilots with comparable landside and airside facilities. Colorado has 62 general aviation airports.

The State’s airports have a variety of uses:

- Search and rescue
- Aerial fire fighting
- Air medical transport
- Public safety
- Agriculture
- Recreation
- Just-In-Time Shipping

**Economic Impact**

In Colorado, in 2003, aeronautics or airports resulted in:

Jobs- 280,156  
Wages- $10 billion  
Economic Activity- $23.5 billion

**Types of Economic Impacts**

**On-Airport Impacts**- Economic impacts that would not occur if the airport did not exist (i.e. payroll, operating costs)

**Visitor Spending**- Financial transactions that occur primarily off-airport and are associated with the visitors to the area (i.e. lodging, food, entertainment, retail purchases)

**Spin-Off Impacts**- These impacts are calculated using impact multipliers, which are used to reflect the recycling of dollars through the economy. A dollar spent in the economy does not disappear; rather, it continues to move through the local economy in successive rounds until it is incrementally exported from the community.
